## **The Prometheus Syndrome:**

**The Prometheus Syndrome** Steven E. Wedel, 2015-06-07 Professor Daniels believes he has found a way to raise the dead He s planning to build a legion of zombies to get revenge against the academics who shut him out for violating their code of ethics But he needs someone with unsuppressed rage to make his experiment work Josh and Rana just want to get to Nashville to meet up with an old friend and reform their rockabilly band When they take a scenic turnoff their lives change forever The Professor finds what he needs in Josh In this harrowing tale of horror set in the 1980s Josh has to confront the worst of himself as it comes after him in the form of a reanimated corpse bent on his destruction Can he save the woman he loves Or even himself

*Of God and Man* Zygmunt Bauman, Stanislaw Obirek, 2015-08-20 In this engaging dialogue Zygmunt Bauman sociologist and philosopher and Stanislaw Obirek theologian and cultural historian explore the place of spirituality and religion in the world today and in the everyday lives of individuals Their conversation ranges from the plight of monotheistic religions cast onto a polytheistic world stage to the nature of religious experience and its impact on human worldviews and life strategies from Messianic and Promethean ideas of redemption and salvation to the possibility and prospects of inter religious dialogue and the factors standing in its way While starting from different places Bauman and Obirek are driven by the same concern to reconcile the multiplicity of religions with the oneness of humanity and to do so in a way that avoids the trap of adhering to a single truth bearing witness instead to the multiplicity of human truths and the diversity of cultures and faiths For everything creative in human existence has its roots in human diversity it is not human diversity that turns brother against brother but the refusal of it The fundamental condition of peace solidarity and benevolent cooperation among human beings is a willingness to accept that there is a multiplicity of ways of being human and a willingness to accept the model of coexistence that this multiplicity requires

**Work on Myth** Hans Blumenberg, 1988-03-18 In this rich examination of how we inherit and transform myths Hans Blumenberg continues his study of the philosophical roots of the modern world Work on Myth is in five parts The first two analyze the characteristics of myth and the stages in the West s work on myth including long discussions of such authors as Freud Joyce Cassirer and Val ry The latter three parts present a comprehensive account of the history of the Prometheus myth from Hesiod and Aeschylus to Gide and Kafka This section includes a detailed analysis of Goethe s lifelong confrontation with the Prometheus myth which is a unique synthesis of psychobiography and history of ideas Work on Myth is included in the series Studies in Contemporary German Social Thought edited by Thomas McCarthy

[The Photosynthetic Bacterial Reaction Center II](#) Jacques Breton, Andre Verméglio, 2012-12-06 The NATO Advanced Research Workshop entitled The Photosynthetic Bacterial Reaction Center Structure Spectroscopy and Dynamics was held May 10 15 1992 in the Maison d H6tes of the Centre d Etudes Nucléaires de Cadarache near Aix en Provence in the south of France This workshop is the most recent of a string of meetings which started in Feldafing Germany in March 1985 soon after the three dimensional structure of the bacterial

reaction center had been elucidated by X ray crystallography This was followed in September 1987 by a workshop in Cadarache and in March 1990 by a second meeting in Feldafing Although one of the most important processes on Earth photosynthesis is still poorly understood Stimulated by the breakthrough of solving the bacterial reaction center structure at atomic resolution the field of relating this structure to the function of the reaction center i e the remarkably efficient conversion and storage of solar energy has been developing vigorously Once the general organization of the cofactors and some details of the protein cofactor interactions were known it became possible to combine a variety of spectroscopic techniques with the powerful tool of site directed mutagenesis in order to address increasingly incisive questions about the specific role of some amino acid residues in the electron transfer process Still another promising tool is being developed namely the exchange of a number of the native bacteriochlorophyll and bacteriopheophytin cofactors by chemically modified pigments Mester ,1984

**The Prometheus Syndrome** Bettina Liebowitz Knapp,1979 The Prometheus Syndrome includes eight essays which focus on a Promethean figure in the fields of science theology or literature or as fictional character The ASCRS Textbook of Colon and Rectal Surgery David E. Beck,Patricia L. Roberts,Theodore J. Saclarides,Anthony J. Senagore,Michael J. Stamos,Yosef Nasseri,2011-06-09 Developed in conjunction with the American Society of Colon and Rectal Surgeons this comprehensive textbook provides readers with the full scope of surgical practice for patients with diseases of the colon and rectum Expert surgeons all active both as educators and with busy clinical practices have written concise and practical chapters on the most commonly done procedures while providing much needed insight on less frequently presentations as well The ASCRS Textbook is designed to meet the needs not only of colorectal specialists but also the general surgeon in practice whose caseload includes patients with disorders and diseases of the colon rectum and anus Residents and fellows will also find a wealth of hands on guidance and practical tips and tricks The ASCRS Practice Parameters are incorporated in the book along with an appendix providing the most up to the minute access to best practice guidelines Patient care and safety are addressed in each chapter The ASCRS Textbook of Colon and Rectal Surgery is a long awaited textbook for those in the field and it does not disappoint It is brief and to the point but does not lack the necessary detail expected from a society produced publication It has an easy to read quality that enhances comprehension for the trainee It is by no means just a student textbook The inclusion of hot current topics like the anal fistula plug makes it fresh and useful for experienced surgeons This is an excellent addition to the colorectal library Doody s Review L'Esprit créateur ,1979

**A Jungian Approach to Literature** Bettina Liebowitz Knapp,1984 This book is the first to apply systematically Jungian psychology to the study of literature throughout the ages The ten essays are purposefully different illustrating the universality of Jungian archetypal analysis and criticism The book has been divided into seven sections the first five follow chronological order from Euripides to Goethe and finally Yeats the sixth and seventh are presented separately because they explore unique psychological experiences Each essay is divided into two parts an archetypal and an

archetypal analysis of the works discussed The ectypal section presents a brief historical summary of the period acquainting readers with ap appropriate facts concerning the author s environment The archetypal analysis however is the most important aspect of A Jungian Approach to Literature Archetypes contained in the collec tive unconscious exist at the deepest level within the subliminal realm They are made manifest in archetypal pri mordial images experienced in such universal motifs as the Great Mother the Spiritual Father Transformation the Self and others The Jungian archetypal approach to literature acts as a broaden ing force in the life experience

The Archetypes of Carlos Fuentes Gloria Durán,1980      **The Golden Scapegoat** Frances Schlamowitz Grodzinsky,1989      **Aesthetic Consciousness in the Philosophical and Literary Texts of José Vasconcelos** Aaron Dziubinskyj,2001      **Pre-text, Text, Context** Robert L. Mitchell,1980

The nineteenth century in France is a nightmare for literary historians Their thirst for categorization is more easily quenched by prior centuries to which because they seem unified by cohesive preoccupations and common goals such appellations as the Renaissance the Classical Age or le grand si cle and the Enlightenment or Age of Ideas are appropriately applied For the protean nineteenth century for which no such handy tag has been or can be devised is beyond all else distinguished by extreme heterogeneity and eclecticism A period of chaotic social and political instability of scientific and industrial revolution it is in literature a time not of solidarity but of unprecedented individualism Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul and revolt against standardized even valorized literary practice is seen in such developments as the slow undermining of the accepted literary lexicon and of the qualities of unity clarity and reason and in a radical overhauling of the system of prosody If such diversity precludes coherence in nineteenth century French literature it can itself be recognized as the 2organizing3 element of this literary epoch And it is precisely this paradox that the essays in this volume intend to reflect They are not unified as orthodoxy might dictate by a common approach or theme or author Rather they are marked as was the century that is their context by divergence and variety not harmony and consistency Multiformity in theme is reflected in discussions of such varied topics as pygmalionism allegory mirage self consciousness plagiarism madness feminism the grotesque dance and alchemy which are addressed in turn from a variety of critical approaches thematic intertextual historical stylistic psychocritical sociological and semiotic Eclecticism indeed has shaped the basic conception of the collection Part 1 examines themes presented as pretext that inform either authorial motivation or the orientation of a text prior to its actual inscription Part 2 approaches the process of writing from the perspective of the text itself And Part 3 is concerned with those spatial temporal and linguistic elements context that surround the literary text

Literary Canons and Religious Identity International Society for Religion, Literature, and Culture. Meeting,2004

The central focus of this volume is the turn to religion in modern and postmodern literature with a special emphasis on the interaction and transformation of both literary and religious canons in contemporary culture The essays represent different approaches to the literary disclosure of the religious in 20th century literature intersecting with

crucial issues in contemporary literary and cultural criticism issues such as gender postcolonialism multiculturalism ethics literature and hermeneutics and trauma theory The contributors combine a specific theoretical methodological stance with a case study in which the literary articulation of a post modern ethical religious receptivity for the Other is demonstrated They explicitly pay attention to the narrative poetical and rhetorical structures and strategies of the texts that is to the tension between representation and performativity

*Manna & Mystery* Bettina Liebowitz Knapp,1995 Through myth individuals as well as the collective gain the illusion of being able to rework their lives In this study Knapp probes myths such as the Golem Dybbuk and the divine child She argues powerfully and persuasively for their relevance to believers of all religions today as they were to the Jews of the past

Schiff's Diseases of the Liver Eugene R. Schiff,Michael F. Sorrell,Willis C. Maddrey,2007 The premier clinical hepatology reference for 50 years Schiff s Diseases of the Liver is in its Tenth Edition now in full color throughout This edition features a major new transplant section focusing on pre transplant and post transplant evaluation and management Also included are updates on key topics such as hepatitis NASH and drug induced pathologies The first third of the book covers anatomy pathology testing imaging and effects of liver disease on other organs Subsequent sections address specific diseases and clinical syndromes Each of the 12 sections begins with an overview and each chapter starts with an outline of key concepts Numerous clinical algorithms appear throughout the text
