Danger Signals Triggering Immune Response and Inflammation Abdulraouf Ramadan, Walter G. Land, Sophie Paczesny, 2017-09-18 The immune system detects danger through a series of what we call pathogen associated molecular patterns PAMPs or damage associated molecular pattern molecules DAMPs

working in concert with both positive and negative signals derived from other tissues PAMPs are molecules associated with groups of pathogens that are small molecular motifs conserved within a class of microbes They are recognized by Toll like receptors TLRs and other pattern recognition receptors A vast array of different types of molecules can serve as PAMPs including glycans and glycoconjugates Bacterial lipopolysaccharides LPSs endotoxins found on the cell membranes of Gram negative bacteria are considered to be the prototypical class of PAMPs LPSs are specifically recognized by TLR4 a recognition receptor of the innate immune system Other PAMPs include bacterial flagellin recognized by TLR5 lipoteichoic acid from Gram positive bacteria peptidoglycan and nucleic acid variants normally associated with viruses such as double stranded RNA recognized by TLR3 or unmethylated CpG motifs recognized by TLR9 DAMPs also known as alarmins are molecules released by stressed cells undergoing necrosis that act as endogenous danger signals to promote and exacerbate the immune and inflammatory response DAMPs vary greatly depending on the type of cell epithelial mesenchymal etc and injured tissue Some endogenous danger signals include heat shock proteins HMGB1 high mobility group box 1 reactive oxygen intermediates extracellular matrix breakdown products such as hyaluronan fragments neuromediators and cytokines like the interferons IFNs Non protein DAMPs include ATP uric acid heparin sulfate and DNA Furthermore accumulating evidence supports correlation between alarmins and changes in the microbiome Increased serum or plasma levels of these DAMPs have been associated with many inflammatory diseases including gastric and intestinal inflammatory diseases graft versus host disease GVHD sepsis and multiple organ failure allergies particularly in the lungs atherosclerosis age associated insulin resistance arthritis lupus neuro inflammation degeneration and more recently in tumors which is particularly interesting with the emergence of immunotherapies Therapeutic strategies are being developed to modulate the expression of these DAMPs for the treatment of these diseases A vast number of reviews have already been published in this area thus in an effort to not duplicate what has already been written we will focus on recent discoveries particularly in disease models that are epidemic in Western society intestinal chronic inflammatory diseases including GVHD and its relationship with the microbiome chronic infectious diseases allergies autoimmune diseases neuroinflammation and cancers We will also focus on the basic cellular roles of macrophages T cells and B cells This research topic brings together sixteen articles that provide novel insights into the mechanisms of action of DAMPS alarmins and their regulation and subsequent immunologically driven responses

a deep learning model of dual stage license plate recognition hindawi - Sep 04 2022

web nov 11 2021 aiming to construct a sufficiently robust license plate recognition model this study adopted multitask learning in the license plate detection stage used the convolutional neural networks of single stage detection retinaface and mobilenet as approaches to license plate location and completed the license plate sampling through

automatic license plate recognition using python and opencv - Oct 05 2022

web license plate recognition using yolov4 object detection opencv and tesseract ocr automatic number plate localization license plate detection using opencv and python number plate text detection with source code license plate detection and

recognition using neural networks

license plate detection and recognition in unconstrained - Apr 30 2022

web methods for automatic license plate recognition alpr most existing approaches are focused on a specific license plate lp region e g eu ropean us brazilian taiwanese etc and frequently explore datasets containing approximately frontal images this work proposes a complete

leveraging model fusion for improved license plate recognition - Dec 07 2022

web sep 8 2023 license plate recognition lpr plays a critical role in various applications such as toll collection parking management and traffic law enforcement although lpr has witnessed significant advancements through the development of deep learning there has been a noticeable lack of studies exploring the potential improvements in results by

[license plate recognition papers with code](#) - Jan 08 2023

web this paper presents an efficient and layout independent automatic license plate recognition alpr system based on the state of the art yolo object detector that contains a unified approach for license plate lp detection and layout classification to improve the recognition results using post processing rules

license plate recognition github topics github - Aug 15 2023

web jul 1 2022 rodosol alpr a dataset for license plate detection and recognition that includes 20k images of vehicles with brazilian mercosur license plates dataset optical character recognition license plate recognition license plate detection scene text recognition automatic license plate recognition

license plate recognition sdk high quality lpr dtk software - Jul 02 2022

web license plate recognition sdk is a software development kit designed for software developers who wants to integrate vehicle license plate recognition into their software the fast and stable lpr engine is built on latest technologies and algorithms and provide highly accurate plate detection from real time video

[rekor carcheck openalpr by rekor](#) - Mar 30 2022

web whether you operate a car wash or an automotive service center carcheck s license plate and vehicle recognition allows you to quickly identify and process customers to decrease wait times while also increasing customer satisfaction
