Caldes, 2002-10-01 At the end of World War II the nation's railroads were eager to replace their abundance of war weary steam locomotives with sleek new diesel engines From Cape May to Bayonne New Jersey's tracks were soon humming with diesels while the old steamers were nudged onto the scrap tracks of the Central New Jersey the Erie and the New York Susquehanna Western Railroads among others Powering a commuter train to Dover or a sand train to Millville's Wheaton glass plant the diesels instantly proved their worth praised by railroad employees for their ease of running and maintenance In an era when most clothes were dried outside the public accepted the new lack of trackside coal ash with gusto Steam to Diesel in New Jersey presents the mixed era of late steam and early diesel power on the big and small railroads of New Jersey from the mid 1940s to the end of the 1950s From the Baldwins to the Alcos the steam spewing Behemoths to the smooth running RS series this engaging collection of vintage photographs remembers a time filled with wonder and change With nearly two hundred images Steam to Diesel in New Jersey showcases the departing steam engines and the emerging diesels that ushered in a new period of railroad history

From Steam to Diesel (video), 1995 **Out of Steam** Jeffrey W. Schramm, 2010 About the Author Jeff Schramm is an associate professor of history at Missouri University of Science and Technology Book Jacket **From Steam to Diesel** Albert J. Churella, 1998-08-03 This overview of the leading locomotive producers in the United States during the twentieth century shows how they responded to a radical technological change the replacement of steam locomotives by diesels The locomotive industry provides a valuable case study of business practices and dramatic shifts in innovation patterns since two companies General Motors and General Electric that had no traditional ties to locomotive production demolished established steam locomotive manufacturers Albert Churella uses many previously untapped sources to illustrate how producers responded to technological change particularly between the 1920s and the 1960s Companies discussed include the American Locomotive Company ALCo the Baldwin Locomotive Works the Lima Locomotive Works Fairbanks Morse the Electro Motive Division of General Motors and General Electric A comparative work of business history and the history of technology the book is not a complete history of any locomotive builder nor does it explore the origins of the diesel engine in great detail What it does and does superbly is to demonstrate how managers addressed radical shifts in technology and production methods Churella reveals that managerial culture and corporate organizational routines more than technological competency per se allowed some companies to succeed yet constrained the actions of others He details the shift from small batch custom manufacturing techniques in the steam locomotive industry to mass production methods in the diesel locomotive industry He also explains that chance events and fortuitous technological linkages helped to shape competitive patterns in the locomotive industry **The Life of a Locomotive Engineer** J. O. Young, 2007-02-26 This book is an account of my experiences growing up in the Southern Appalachian Mountains about exciting situations I found myself in as a pilot and aircraft owner

for 20 some years Also many times I have been asked about the operations of a railroad I have tried in this book to relate some of these operations while telling what goes on in the cab and the sights that are seen through a locomotive windshield I have also related some of the narrow escapes and dangerous situations I have found myself in as an Engineer for forty years Sometimes it was humorous sometimes scary sometimes deadly So all you guys and gals who always thought you wanted to be a locomotive engineer let me tell you about what you missed In some instances you ll be glad you did **Diesel Railway Traction** ,1946 Shipbuilding and Shipping Record ,1927 **Technical Bulletin** ,1930 Steam to Diesel in New Jersey Charles P.
