Symbolic And Knowledge Based Signal Processing:

　　Symbolic and Knowledge-based Signal Processing Alan V. Oppenheim,Syed Hamid Nawab,1992 Aimed at signal processors and computer scientists this book of self contained discussions explores how computer science can enhance the performance of signal processing systems and their design　　*An Object-oriented Signal Processing Environment* Evangelos E. Millios,W. P. Dove,C. Myers,1984 A LISP based signal processing package for integrated numeric and symbolic manipulation of discrete time signals is described The package is based on the concept of signal abstraction in which a signal is defined by its non zero domain and by a method for computing its samples Most common signal processing operations are defined in the package and the package provides simple methods for the definition of new operators The package provides facilities for the manipulation of infinite duration signals and periodic signals for the efficient computation of signals over intervals and for the catching of signal values The package is currently being expanded to provide for manipulation of continuous time signals and symbolic signal transformations such as the Fourier transform to form the basis of knowledge based signal processing systems　　Handbook of VLSI Chip Design and Expert Systems A. F. Schwarz,2014-05-10 Handbook of VLSI Chip Design and Expert Systems provides information pertinent to the fundamental aspects of expert systems which provides a knowledge based approach to problem solving This book discusses the use of expert systems in every possible subtask of VLSI chip design as well as in the interrelations between the subtasks Organized into nine chapters this book begins with an overview of design automation which can be identified as Computer Aided Design of Circuits and Systems CADCAS This text then presents the progress in artificial intelligence with emphasis on expert systems Other chapters consider the impact of design automation which exploits the basic capabilities of computers to perform complex calculations and to handle huge amounts of data with a high speed and accuracy This book discusses as well the characterization of microprocessors The final chapter deals with interactive I O devices This book is a valuable resource for system design experts circuit analysts and designers logic designers device engineers technologists and application specific designers

Richards,Anthony J. Gadient,Geoffrey A. Frank,1997-02-28 Rapid Prototyping of Application Specific Signal Processors presents leading edge research that focuses on design methodology infrastructure support and scalable architectures developed by the 150 million dollar DARPA United States Department of Defense RASSP Program The contributions to this edited work include an introductory overview chapter that explains the origin concepts and status of this effort The RASSP Program is a multi year DARPA Tri Service initiative intended to dramatically improve the process by which complex digital systems particularly embedded signal processors are designed manufactured upgraded and supported This program was originally driven by military applications for signal processing The requirements of military applications for real time signal processing are typically more demanding than those of commercial applications but the time gap between technology employed in advanced military prototypes and commercial products is narrowing rapidly The research on methodologies infrastructure and architectures presented in this book is applicable to commercial signal processing systems that are in design now or will be developed before the end of the decade Rapid Prototyping of Application Specific Signal Processors is a valuable reference for developers of embedded digital systems particularly systems engineers for signal processing systems such as digital TV biomedical image processing systems and telecommunications and for military contractors who are developing signal processing systems This book will also be of interest to managers who are charged with responsibility for creating and maintaining environments and infrastructures for developing large embedded digital systems The chief value for managers will be the defining of methods and processes that reduce development time and cost   **Journal of VLSI Signal Processing Systems for Signal, Image, and Video Technology** ,1997   ICASSP 83 ,1983   *ICASSP 88: D, digital signal processing* ,1988   **ICASSP 84** ,1984   Computer Explorations in Signals and Systems Using MATLAB John R. knowledge and to extract refine and revise knowledge within a neurocomputing system Neurocomputing methods are loosely based on a model of the brain as a network of simple interconnected processing elements corresponding to neurons These methods derive their power from the collective processing of artificial neurons the chief advantage being that such systems can learn and adapt to a changing environment In knowledge based neurocomputing the emphasis is on the use and representation of knowledge about an application Explicit modeling of the knowledge represented by such a system remains a major research topic The reason is that humans find it difficult to interpret the numeric representation of a neural network The key assumption of knowledge based neurocomputing is that knowledge is obtainable from or can be represented by a neurocomputing system in a form that humans can understand That is the knowledge embedded in the neurocomputing system can also be represented in a symbolic or well structured form such as Boolean functions automata rules or other familiar ways The focus of knowledge based computing is on methods to encode prior knowledge and to extract refine and revise knowledge within a neurocomputing system ContributorsC Aldrich J Cervenka I Cloete R A Cozzio R Drossu J Fletcher C L Giles F S Gouws M Hilario M Ishikawa A Lozowski Z Obradovic C W Omlin M Riedmiller P Romero G P J Schmitz J Sima A Sperduti M Spott J Weisbrod J M Zurada   Trends & Perspectives in Signal Processing ,1981   **ICASSP 85** ,1985   **Conference Record of the ...
