**Information Systems Project Management** David Avison, Gholamreza Torkzadeh, 2008-08-22 View IS project management as an art as well as a science There are a number of books out there on project management What is different and specific about this book There is a balance between socio cultural and technical aspects and there is a balance between qualitative and quantitative aspects

project management is seen as both an art and a science It provides an information systems orientation for project management neither information technology oriented on the one side nor production and operations oriented on the other but of application to both within an organizational wide view It stresses information systems as a whole not just software development no project is successful if only software aspects are considered It gives a truly international view of the domain examples and experiences from different parts of the world add richness as well as context to the material Globalization has ensured that most projects take on an international dimension The book provides a coherent explanation of the concerns of the project manager as the project develops through the project life cycle it does not follow a kitchen sink approach Each chapter has the following consistent structure introduction and outline an exhibit the main text with examples chapter summary exercises discussion questions interview with project manager and appendix this structure provides coherence and consistency The exhibit interview and appendix contain real world examples experiences case studies discussion material software descriptions and professional codes these provide material for class discussion and group work The material has been used on our courses in the United States Europe and Australia given to practitioners as well as students both undergraduate and postgraduate it has been well tested as part of our own project management The material in this text has been proven successful through repeated use in courses in the United States Europe and Australia by practitioners as well as undergraduate and postgraduate students Intended Audience This core text is designed for advanced undergraduate and graduate courses such as Management Information Systems Computer Information Systems Information Systems and Decision and Information Systems in the departments of information systems information technology and business
