When Governments Collide [electronic Resource] Don (Donald Alexander) Trudeau, 2005

When Governments Collide Alexandre Couture Gagnon, 2026 When Governments Collide Competition Within Nations in Quebec and Catalonia offers a comparative analysis of Quebec and Catalonia from the perspective of minority cultures operating within broader states where their cultures and identities sometimes come in conflict with that of the majority focusing on language immigration and foreign affairs policy Since the mid to late 20th century Quebec and Catalonia have been demanding greater powers from their respective federal or central governments While Quebec has obtained significant powers over key identity policies language immigration and international relations from Ottawa Catalonia has faced strong opposition from Madrid This book looks at how each sub state navigates its position within its federative context environment and how they negotiate and leverage policies in relation to their respective federal governments It starts by exploring the external factors that have played a large role in allowing Quebec to obtain more powers than Catalonia such as the impact of Franco's dictatorship on linguistic policy Also central to the book's analysis is the argument that incremental demands are more likely to be successful than sweeping requests This incrementalism thesis suggests that minority nation governments are more likely to secure concessions from central political authorities by taking smaller less provocative steps While this strategy has practical implications the book also addresses its limitations noting that incrementalism may not always be feasible or effective This book will be of great interest to students and scholars of comparative public policy and politics and nationalism providing a timely perspective on forms of minority nationalism Provided by publisher

Writing the Arab-Israeli Conflict Jonathan B. Isacoff, 2006-03-30 Nearly all empirical work in political science is fundamentally historical yet very little attention has been given to the problem of grounding claims to historical knowledge In *Writing the Arab Israeli Conflict* Jonathan B Isacoff constructs the nature of historical knowledge by deftly examining the multiple histories of the Arab Israeli conflict written by generations of Israeli scholars He also undertakes briefer analysis of literature drawn from both historians and political scientists of the Vietnam War demonstrating that historical revisionism is not unique to the study of the Middle East Focusing on different schools of historical interpretation *Writing the Arab Israeli Conflict* argues for a pragmatist approach in the tradition of John Dewey Most importantly this exceptional work suggests a number of practical methodological measures that can be taken to produce more sophisticated and nuanced political science scholarship

[Cult of the Irrelevant](#) Michael C. Desch, 2021-09-28 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To

mobilize America's intellectual resources to meet the security challenges of the post 9/11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In *Cult of the Irrelevant* Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch's narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way

Pay Any Price Lloyd C. Gardner,1997 Lyndon Johnson brought to the presidency a political outlook steeped in New Deal liberalism and the idea of government intervention for the public good at home or abroad Seeking to fulfill John Kennedy's pledge in Southeast Asia LBJ constructed a fatal coupling of the Great Society and the anti Communist imperative Pay Any

Price is Lloyd Gardner's riveting account of the fall into Vietnam of behind the scenes decision making at the highest levels of government of miscalculation blinkered optimism and moral obtuseness Blending political biography with diplomatic history Gardner has written the first book on American involvement in the Vietnam War to use the full resources and newly declassified documents of the Johnson Library and to tell whole the story of Johnson and Vietnam The book is filled with fresh interpretations brilliantly incisive portraits of the president and his men and new perspectives on America's most divisive foreign war Gardner describes for the first time how as tragedy swirled around the deliberations in Washington Clark Clifford and Dean Rusk struggled for the president's soul culminating in the bombing halt of 1968 and the Johnson decision not to run The war finally sundered the liberal cold war consensus Gardner argues and brought to an end the New Deal politics that had dominated American political life since 1933 Pay Any Price is a major work of history by one of our most distinguished historians
