Political and Economic Analysis of State-Owned Enterprise Reform Huiming Zhang, 2021-07-29 In revisiting the forty year

history of reforms to China's state-owned enterprises (SOE) the book assesses the experiences of this process of reform and scrutinizes how this has helped advance the country's economy overall. The author finds that China's SOE reform not only commits to institutional innovation within the corporation in terms of operating mechanisms, management structure, legal organization, and the economic system of the enterprise but that it is also underpinned by a series of policies that highlight an increasing market orientation. The measures have given rise to a benign interaction between enterprise reform and market development while switching the SOE's role from appendages of government organs under a planned economic system to more autonomous entities that integrate public ownership and the market economy. In this regard, SOE reform's success in constructing a modern enterprise system serves as the micro foundation and core of an improved socialist market economic system. The book will appeal to academics and students interested in political economy and the Chinese economy with particular reference to SOE reform and the recent economic transition in China.

Gender, China and the World Trade Organization Günseli Berik, Xiao-yuan Dong, Gale Summerfield, 2013-09-13. China's joining the World Trade Organization at the end of 2001 signifies a milestone in the country's global integration after two decades of economic reforms that have fundamentally transformed the economic organization of China. This collection seeks to identify the gendered implications within China of the country's transition from socialism to a market economy and its opening up to international trade and investment. The changes have created greater wealth for some while at the same time serious gender, class, ethnic, and regional disparities have also emerged. Drawing from historical, analytical, and policy-oriented work, the essays in this collection explore women's well-being relative to men's in rural and urban China by looking at land rights, labor market status, and labor rights, household decision-making, health, the representation of women in advertising and beauty pageants. This book was previously published as a special issue of the journal *Feminist Economics*, the official journal of the International Association for Feminist Economics (IAFFE). All contributions have been subjected to the journal's rigorous peer review process and comply with the journal's editorial policies as overseen by the editor Diana Strassmann and the journal's editorial team, including the associate editors, the editorial board, numerous volunteer reviewers, and the journal's in-house editorial staff and freelance style editors. The special issue and book have been made possible by the generous financial support of Rice University and the Ford Foundation, Beijing.

The Current Wave of State Enterprise Reform in China Barry J. Naughton, 2017. State enterprise reforms are underway in China and include some positive and overdue corporate governance reform. However, the potential effectiveness of the reforms is compromised by the attempt of policy makers to achieve three goals which form an impossible

trinity increase firm autonomy improve oversight and assign new developmental missions to state firms The goal of assigning new developmental missions to state firms is reflected in the design of new state investment companies which are intended to gradually take over ownership functions from existing agencies The structure and function of the new ownership agencies undermines the potential of the corporate governance reforms at the enterprise level These contradictions will be costly because state firms will likely be ineffective in carrying out developmental missions particularly technology innovation while also failing in the enterprise reform goal of becoming more efficient and profitable
