Statistical Methods for the Assessment of Point Source Pollution D.T. Chapman, A.H. El-Shaarawi, 2012-12-06. This book contains the proceedings of a workshop on Statistical Methods for the Assessment of Point Source Pollution held September 12-14, 1988, at the Canada Centre for Inland Waters in Burlington, Ontario, Canada. The objectives of the workshop were to advance the art, science, and application of statistical methods to current water quality issues by stimulating discussions and disseminating ideas and information. The emphasis was on statistical problems associated with monitoring and controlling discharges from industries and municipalities and assessing the impact of these discharges on receiving water quality. It provides a forum for managers, engineers, scientists, and statisticians to present and discuss techniques for evaluating water quality data and planning monitoring activities. It provides a published state-of-the-art summary of the application of statistical methods for the assessment of point source discharges and their impact on water quality. The papers contained in this volume cover a number of topics that are of concern not only for monitoring and assessing point source pollution but also for other environmental problems.

System Analysis and Data Mining Michael Zgurovsky, Nataliya Pankratova, 2025-11-11. This book presents the latest scientific contributions by Ukrainian researchers and their international colleagues in four interrelated fields: systems analysis, systems mathematics, computational intelligence, and data mining. The included papers explore both the theoretical foundations and practical applications of cutting-edge technologies across a wide range of topics, including but not limited to global security, artificial intelligence, environmental risks, financial systems, health care, digital twins, distributed computing, assistive robotics, and other critical areas of human activity. These fields are united by the complexity of the systems involved, the presence of uncertainty, and multifactorial risks. The methods and models presented in this volume will be valuable for researchers, educators, graduate and postgraduate students, as well as practitioners who implement modern tools and knowledge in systems analysis, artificial intelligence, and data mining to drive innovation in the digital economy. This book makes a significant contribution to

the advancement of a systems based approach to understanding global transformations It highlights how the integration of fundamental science mathematical modeling and intelligent technologies can offer profound insights into complex phenomena and support informed decision making in vital sectors of contemporary life
