Shoukri, Victoria L. Edge, 1996 A substantial portion of epidemiologic studies particularly in community medicine veterinary herd health field trials and repeated measures from clinical investigations produce data that are clustered and quite heterogeneous Such clustering will inevitably produce highly correlated observations thus standard statistical techniques in non specialized biostatistics textbooks are no longer appropriate in the analysis of such data For this reason it was our mandate to introduce to our audience the recent advances in statistical modeling of clustered or correlated data that exhibit extra variation or heterogeneity from the Preface Statistical Testing Strategies in the Health Sciences Albert Vexler, Alan D.
