Schalley,Dietmar Zaefferer,2008-08-22 Current progress in linguistic theorizing is more and more informed by cross linguistic including cross modal investigation Comparison of languages relies crucially on the concepts that can be coded with similar effort in all languages These concepts are part of every language user s ontology the network of cross connected conceptualizations the mind uses in coping with the world Assuming that language comparability is rooted in the comparability of user ontologies the idea of the present volume is to further instigate progress in linguistics by looking behind the interface with the conceptual intentional system and asking a still underexplored question How are ontological structures reflected in intra and cross linguistic regularities This question defines the research program of ontology based linguistics or ontolinguistics Recent advances in the theory of language have been characterized by an emphasis on external explanatory adequacy and thus on relating language to other phenomena The research program introduced in this volume adds a decisively distinct and fresh aspect to this emerging new contextualization of the field by bringing together insights from different areas mainly linguistics but also neuroscience philosophy and artificial intelligence In providing these disciplines with a new common task the exploration of the impact of ontological structures on linguistic regularities the ontolinguistic approach promises to develop into a vital branch of cognitive science Documenting the beginnings the book aims to instigate future interdisciplinary research in this area It will be of interest to researchers in linguistics artificial intelligence philosophy and cognitive science in general **The Transparent Becoming of World** Gordon G. Globus,2009-10-22 *The Transparent Becoming of World* undertakes a penetrating inquiry into the quotidian world we take for granted and the brain that silently hoists our bubbles of world thrownness After critiquing the traditional views of direct realism indirect realism and idealism the continual becoming of world is explained by a novel integration of process dynamics as formulated by Whitehead Heidegger and Bohm with the burgeoning field of quantum neurophilosophy A rich ontological duality newly opened by quantum brain theory is exploited the between two of dual quantum modes Existence as world thrownness is between two in waking and dreaming alike This highly original interdisciplinary book may be of interest to philosophers psychologists neuroscientists consciousness researchers indeed anyone attracted to the enigma of their own lived existence Series A

Nothing Slavoj Zizek, 2012-05-22 Discover a 1 000 page resurrection of Hegel a giant of Western philosophy from one of the world s best known public intellectuals New York Review of Books For the last two centuries Western philosophy has developed in the shadow of Hegel an influence each new thinker struggles to escape As a consequence Hegel s absolute idealism has become the bogeyman of philosophy obscuring the fact that he is the defining philosopher of the historical transition to modernity a period with which our own times share startling similarities Today as global capitalism comes apart at the seams we are entering a new period of transition In *Less Than Nothing* the product of a career long focus on the part of its author Slavoj i ek argues it is imperative we not simply return to Hegel but that we repeat and exceed his triumphs overcoming his limitations by being even more Hegelian than the master himself Such an approach not only enables i ek to diagnose our present condition but also to engage in a critical dialogue with key strands of contemporary thought Heidegger Badiou speculative realism quantum physics and cognitive sciences Modernity will begin and end with Hegel

Specifications and Drawings of Patents Issued from the U.S. Patent Office United States. Patent Office, 1877 **The Parallax View** Slavoj Zizek, 2009-02-13 In i ek s long awaited magnum opus he theorizes the parallax gap in the ontological the scientific and the political and rehabilitates dialectical materialism The Parallax View is Slavoj i ek s most substantial theoretical work to appear in many years i ek himself describes it as his magnum opus Parallax can be defined as the apparent displacement of an object caused by a change in observational position i ek is interested in the parallax gap separating two points between which no synthesis or mediation is possible linked by an impossible short circuit of levels that can never meet From this consideration of parallax i ek begins a rehabilitation of dialectical materialism Modes of parallax can be seen in different domains of today s theory from the wave particle duality in quantum physics to the parallax of the unconscious in Freudian psychoanalysis between interpretations of the formation of the unconscious and theories of drives In *The Parallax View* i ek with his usual astonishing erudition focuses on three main modes of parallax the ontological difference the ultimate parallax that conditions our very access to reality the scientific parallax the irreducible gap between the phenomenal experience of reality and its scientific explanation which reaches its apogee in today s brain sciences according to which nobody is home in the skull just stacks of brain meat a condition i ek calls the unbearable lightness of being no one and the political parallax the social antagonism that allows for no common ground Between his discussions of these three modes i ek offers interludes that deal with more specific topics including an ethical act in a novel by Henry James and anti anti-Semitism The Parallax View not only expands i ek s Lacanian Hegelian approach to new domains notably cognitive brain sciences but also provides the systematic exposition of the conceptual framework that underlies his entire work Philosophical and theological analysis detailed readings of literature cinema and music coexist with lively anecdotes and obscene jokes
