Vi For Short:

Sara Paretsky Margaret Kinsman, 2016-10-13 Sara Paretsky's groundbreaking mystery series about Chicago private investigator V I Warshawski debuted in 1982 and is still going strong. She is a co-founder of Sisters in Crime, a worldwide organization supporting women writers, a sought-after public speaker, and the 2015 president of the Mystery Writers of America. This book is the first comprehensive reference work on Paretsky, providing an overview of the Warshawski novels and short stories, her other novels, a volume of collected essays, her anthologies, and journalism. Special attention is paid to the character of Warshawski, the tough street-smart detective who challenges stereotypical representations of women in crime fiction, and to the significance of the Chicago setting. A guide to the scholarly and critical debates is included, along with discussion of media adaptations and references to key websites. [Astronautics](#) Ulrich Walter, 2024 Zusammenfassung This book covers all the key concepts, relationships, and ideas behind spaceflight and is the perfect companion for students pursuing courses on or related to astronautics. As a crew member of the STS 55 Space Shuttle mission and a full professor of astronautics at the Technical University of Munich, Ulrich Walter is an acknowledged expert in the field. This book is based on his extensive teaching and work with students, and the text is backed up by numerous examples drawn from his own experience. With its end-of-chapter examples and problems, this book is suitable for graduate-level or even undergraduate courses in spaceflight, as well as for professionals working in the space industry. This fourth edition includes substantial revisions of many sections to extend their coverage. These include an overview of the different approaches to solving Newton's gravitational equation of motion, a concise and newly structured coverage of orbital maneuvering, an enlarged and improved section about the sphere of influence, a new section about hierarchical three-body systems, major enlargements in space reference frames and orbit geometry, and a new section about the earth reference ellipsoid.
