## Young Old Masters:

*Old Masters and Young Geniuses* David W. Galenson, 2006 When in their lives do great artists produce their greatest art Do they strive for creative perfection throughout decades of painstaking and frustrating experimentation or do they achieve it confidently and decisively through meticulous planning that yields masterpieces early in their lives By examining the careers not only of great painters but also of important sculptors poets novelists and movie directors *Old Masters and Young Geniuses* offers a profound new understanding of artistic creativity Using a wide range of evidence David Galenson demonstrates that there are two fundamentally different approaches to innovation and that each is associated with a distinct pattern of discovery over a lifetime Experimental innovators work by trial and error and arrive at their major contributions gradually late in life In contrast conceptual innovators make sudden breakthroughs by formulating new ideas usually at an early age Galenson shows why such artists as Michelangelo Rembrandt C zanne Jackson Pollock Virginia Woolf Robert Frost and Alfred Hitchcock were experimental old masters and why Vermeer van Gogh Picasso Herman Melville James Joyce Sylvia Plath and Orson Welles were conceptual young geniuses He also explains how this changes our understanding of art and its past Experimental innovators seek and conceptual innovators find By illuminating the differences between them this pioneering book provides vivid new insights into the mysterious processes of human creativity *The Young Old Masters* Christian C. Wagner, Mary M. Norris, 1998 *Young Geniuses and Old Masters* David W. Galenson, Robert Jensen, 2001 There have been two very different life cycles for great artists some have made their greatest contributions very early in their careers whereas others have produced their best work late in their lives These two patterns have been associated with different working methods as art s young geniuses have worked deductively to make conceptual innovations while its old masters have worked inductively to innovate experimentally We demonstrate the value of this typology by considering the careers of four great conceptual innovators Masaccio Raphael Picasso and Johns and five great experimental innovators Michelangelo Titian Rembrandt ezanne and Pollock Recognition of the effect of an artist s methods on the timing of his contribution appears to solve a puzzle that has been recognized by art historians for more than a century **Humbug!** Wendy Jean Katz, 2020-02-04 One of Hyperallergic s Top Ten Art Books for 2021 Approximately 300 daily and weekly newspapers flourished in New York before the Civil War A majority of these newspapers even those that proclaimed independence of party were motivated by political conviction and often local conflicts Their editors and writers jockeyed for government office and influence Political infighting and their related maneuvers dominated the popular press and these political and economic agendas led in turn to exploitation of art and art exhibitions *Humbug* traces the relationships class animosities gender biases and racial projections that drove the terms of art criticism from the emergence of the penny press to the Civil War The inexpensive penny papers that appeared in the 1830s relied on advertising to survive Sensational stories satire and breaking news were the key to selling papers on the streets Coverage of local politicians markets crime and

personalities including artists and art exhibitions became the penny papers lifeblood. These cheap papers though unquestionably part of the period's expanding capitalist economy offered socialists, working class men, bohemians, and utopianists a forum in which they could propose new models for American art and society and tear down existing ones. Arguing that the politics of the antebellum press affected the meaning of American art in ways that have gone unrecognized, Humbug covers the changing politics and rhetoric of this criticism. Author Wendy Katz demonstrates how the penny press's drive for a more egalitarian society affected the taste and values that shaped art and how the politics of their art criticism changed under pressure from nativists, abolitionists, and expansionists. Chapters explore James Gordon Bennett's New York Herald and its attack on aristocratic monopolies on art, the penny press's attack on the American Art Union, an influential corporation whose Board purchased artworks from living artists, exhibited them in a free gallery, and then distributed them in an annual five dollar lottery, exposés of the fraudulent trade in Old Masters works, and the efforts of socialists, freethinkers, and bohemians to reject the authority of the past.

**Nutrition, Aging, and the Elderly** D.E. Danford, H.N. Munro, 2013-11-11  
The proportion of the population over 65 years of age is increasing steadily in most industrialized countries. In the United States, the proportion of elderly people has risen from four percent in 1900 to 11% in 1978 and is projected to be 14% by the year 2000. The occurrence of debilitating chronic diseases in the elderly increases with each additional year. These diseases, along with the natural loss of tissue function that occurs throughout adult life, impose a heavy burden on the health care system. Nutrition plays an important etiologic role in many of these degenerative changes. Consequently, the aging segment of the population presents a challenge to the nutrition scientist who should be able to recommend optimal intakes of nutrients to minimize the functional losses associated with aging and to optimize the health of those already elderly. This sixth volume in the series *Human Nutrition: A Comprehensive Treatise* provides a conspectus of the various interactions of nutrition with the aging process and a comprehensive survey of current knowledge of the amounts of individual nutrients needed by the elderly. The volume begins with a general survey of the multifaceted relationship of nutrition to aging, followed by four chapters on how nutrition can affect age-related changes in selected body functions. The next six chapters cover the available evidence regarding the needs of the elderly for dietary energy, protein, calcium, trace elements, vitamins, and fiber.

**In Search of Singularity** Joanna Krenz, 2022-08-22  
*In Search of Singularity* introduces a new comparative methodology that seeks to understand how the interplay of paired texts creates meaning in new transcultural contexts. Bringing the worlds of contemporary Polish and Chinese poetry since 1989 into conversation with one another, Joanna Krenz applies the concept of singularity to draw out resonances and intersections between these two discourses and shows how they have responded to intertwined historical and political trajectories and a new reality beyond the human. Drawing on developments such as AI poetry and ecopoetry, Krenz makes the case for a fresh approach to comparative poetry studies that takes into account new forms of poetic expression and probes into alternative grammars of understanding.
