Too Tall Houses Gianna Marino,2012-09-27 Good friends learn a small but important lesson Owl and Rabbit are good friends and live in two small houses next to each other They are perfectly happy until Rabbit s garden gets in the way of Owl s view So Owl builds his house a little taller Only that blocks the sun from Rabbit s vegetables So Rabbit builds his house taller And soon it s a house building frenzy and the two now not so good friends have the two tallest houses in the world All it takes is a gust of wind to remind them that maybe living smaller and together is a much better way to remain friends The creator of Meet Me at the Moon has delivered another wonderful animal fable for today s world

Robertson,Takeo Naka,1980-01-01 Prepared by the Council on Tall Buildings and Urban Habitat of ASCE This report examines the loads to which tall buildings are subjected so that engineers can precisely define the related structural elements that are necessary before translating a client s needs into a safe design The report explores five different classes of loads gravity loads and temperature affects earthquake loads wind loading and wind effects fire and accidental loads as well as quality control and overall safety considerations Steel buildings which hold the record for height tax the designer s ingenuity to provide adequate resistance to lateral loading Concrete buildings are both more numerous and widely distributed and for them vertical gravity loads may be the chief problem Both steel and concrete buildings and lateral and vertical loads are addressed Other subjects covered include dead live cyclic snow construction and combined loads code requirements meteorological and environmental factors in design firefighting provisions and modeling Contributions came from more than 800 contributors all international and professional and heavily representing design and industrial firms Condensed references follow each chapter and a glossary is included *Noun Phrase Structure in the Languages of Europe* Frans Plank,2008-08-22 The result of over five years of close collaboration among an international group of leading typologists within the EUROTYP program this volume is about the morphology and syntax of the noun phrase Particular attention is being paid to nominal inflectional

categories and inflectional systems and to the syntax of determination modification and conjunction Its areal focus like that of other EUROTYPE volumes is on the languages of Europe but in order to appreciate what is peculiarly European about their noun phrases a more comprehensive and genuinely typological view is being taken at the full range of cross linguistic variation within this structural domain There has been no shortage lately of contributions to the theory of noun phrase structure the present volume is however unique in the extent to which its theorizing is empirically grounded
