Use Of Baseline In Acquisition Program Management:

The Use of Baseline in Acquisition Program Management ,1997 All major weapon system programs establish a program baseline early in the acquisition cycle which sets forth cost schedule and performance targets for the program If the thresholds are exceeded a review and assessment procedure is initiated in an attempt to understand why the threshold was breached and how the program can be brought back on track Most programs experience events that require changes to their baselines at some point in their life cycles The baselining process can be a useful management tool for acquisition managers by providing metrics for measuring program status and a process for responding to deviations from the plan The overall goal of the research reported here is to enhance the usefulness of the acquisition program baselining APB process as a management tool for acquisition decisionmakers This report documents the results of both Phase 1 and Phase 2 research efforts It should interest analysts and government officials concerned with the defense acquisition process The Use of Baseline in Acquisition Program Management Jeffrey A.
