Using Health Economics In Health Services Rationing Rationally

BM King

Using Health Economics In Health Services Rationing Rationally:

Using Health Economics in Health Services Ruth McDonald, 2002 The book presents findings from an ethnographic study of one health authority and one primary care group to present a rich picture of the processes and contexts of healthcare resource allocation at local level The conclusion of the book is that it is extremely difficult to use rational solutions to resource allocation dilemmas at local level in the modern state The adoption by local decision makers of what appear to be non rational coping strategies is essential to the maintenance of service delivery in the context of resource scarcity Paradoxically attempts to impose rational decision making threaten to undermine the precarious stability of the very systems they seek to improve

The Elgar Companion to Health Economics Andrew M. Jones, 2012 The Elgar Companion to Health Economics is a comprehensive and accessible look at the field as seen by its leading figures Joseph Newhouse Harvard Medical School US Acclaim for the first edition This Companion is a timely addition It contains 50 chapters from 90 contributors around the world on the topical and policy relevant aspects of health economics there is a balanced coverage of theoretical and empirical materials and conceptual and practical issues I have found the Companion very useful Sukhan Jackson *Economic Analysis and Policy* This encyclopedic work provides interested readers with an authoritative and comprehensive overview of many if not all of the current research issues in health economics Highly recommended Upper level undergraduates and above R M Mullner *Choice* This comprehensive collection brings together more than 50 contributions from some of the most influential researchers in health economics It authoritatively covers theoretical and empirical issues in health economics with a balanced range of material on equity and efficiency in health care systems health technology assessment and issues of concern for developing countries This thoroughly revised second edition is expanded to include four new chapters while all existing chapters have been extensively updated The Elgar Companion to Health Economics Second Edition intends to take an audience of advanced undergraduates postgraduates and researchers to the current frontier of research by providing concise and readable introductions to key topics

Complexity and Healthcare Organization David Kernick, 2018-04-19 Statistics and evidence based medicine are assessed in most postgraduate and undergraduate medical examinations and degrees in health sciences All clinicians have to acquire skills in this area This book aims to provide a brief overview of basic medical statistics and the numerical aspects of evidence based medicine to give realistic worked examples to illustrate the interpretation of studies relevant to clinical practice and to allow examination practice It aims to cover all major topics covered in the undergraduate and postgraduate examinations Each chapter begins with an overview and summary of the main points followed by worked examples and exercises with full answers It will be ideal for all postgraduate medical examination candidates Other clinicians and undergraduate students in medicine and health sciences will also find it useful

Social Sciences in Health Care and Medicine Janet B. Garner, Thelma C. Christiansen, 2008 Health care and medicine are dependent upon a close interaction with social sciences and professions in

order to effectively treat patients Although medicines have becoming more and more targeted in recent times it is the recovery of the patient which is the true test of the system whether it be in a hospital setting or within a daily societal setting Such interactions may be psychological or interactions with social organisations essential to phase the patient back into society This book presents new issues experiences and research in the field from around the globe *Cancer Control* J. Mark Elwood, Simon B. Sutcliffe, 2010-01-07 Cancer control is the term applied to the development of integrated population based approaches to reduce the incidence and mortality from cancer and to minimize its impact on affected individuals and on the community It covers a spectrum of prevention early diagnosis optimal treatment and supportive and palliative care It emphasizes the application of new knowledge gained through research to achieve current best practice Cancer control has become a political priority in many countries in recent years with the evolution of both national and regional cancer control strategic plans The integrated nature of cancer control involving a wide spectrum of health care professionals researchers and health managers and planners is reflected in this multi disciplinary text which is the first in this rapidly developing field

Encyclopedia of Health Economics, 2014-02-21 The Encyclopedia of Health Economics offers students researchers and policymakers objective and detailed empirical analysis and clear reviews of current theories and policies It helps practitioners such as health care managers and planners by providing accessible overviews into the broad field of health economics including the economics of designing health service finance and delivery and the economics of public and population health This encyclopedia provides an organized overview of this diverse field providing one trusted source for up to date research and analysis of this highly charged and fast moving subject area Features research driven articles that are objective better crafted and more detailed than is currently available in journals and handbooks Combines insights and scholarship across the breadth of health economics where theory and empirical work increasingly come from non economists Provides overviews of key policies theories and programs in easy to understand language **Library of Congress Subject Headings** Library of Congress. Pricing Life Peter A. Ubel, 2000 A rational look at health care rationing from ethical economic psychological and clinical perspectives Although managed health care is a hot topic too few discussions focus on health care rationing who lives and who dies death versus dollars In this book physician and bioethicist Peter A Ubel argues that physicians health insurance companies managed care organizations and governments need to consider the cost effectiveness of many new health care technologies In particular they need to think about how best to ration health care Ubel believes that standard medical training should provide physicians with the expertise to decide when to withhold health care from patients He discusses the moral questions raised by this position and by health care rationing in general He incorporates ethical arguments about the appropriate role of cost effectiveness analysis in health care rationing empirical research about how the general public wants to ration care and clinical insights based on his practice of general internal medicine Straddling the fields of ethics economics research psychology and clinical medicine he moves the debate forward from whether to ration to how to ration The discussion is enlivened by actual case studies
