Chinese vs. Western Perspectives Jinghao Zhou,2013-12-04 China is on the rise in the globalized world The relationship between China and the United States has become the most important global issue in the twenty first century It is urgent to understand what is happening in China and where China is heading However there are many misconceptions about China in the West which affect Westerners ability to objectively understand China and ultimately influence the making of foreign policy toward China The author attempts to challenge the misconceptions coming from both Western societies and China and offer an integrated picture of contemporary

China through systematically examining the major aspects of contemporary Chinese society and culture with the most recent data and presents convincing arguments in eighteen chapters for spurring mutual understanding between China and the West. The author intends this book to be an interdisciplinary and comprehensive guide to China for a general audience and it covers a wide variety of topics including history, family, population, Chinese women, economy, environmental issues, politics, religion, media, U.S. China relations, and other subjects. This book demonstrates the author's extensive research and thoughtful examination of many sides of controversial issues related to China with a nice balance of Western and Chinese scholarship. This is one of the few that are authored by scholars who originate from China and have their professional career in the United States but it is distinctive from the rest of studies on this subject in that the author is committed to examining today's China from Chinese as well as Western perspectives. This is not only a scholarly book but also is suitable for general classes on China.

Expanding Worldviews: Astrobiology, Big History and Cosmic Perspectives Ian Crawford, 2021-06-07

This book collates papers presented at two international conferences held at the Australian National University in 2018 and Birkbeck College London in 2019, exploring the relationships between big history and astrobiology and their wider implications for society. These two relatively new academic disciplines aim to integrate human history with the wider history of the universe and the search for life elsewhere. The book will show that despite differences in emphasis, big history and astrobiology share much in common, especially their interdisciplinary approaches and the cosmic and evolutionary perspectives that they both engender. Specifically, the book addresses the unified all-embracing nature of knowledge, the impact of big history on humanity and the world at large, the possible impact of SETI on astrobiology and big history, the cultural signature of Earth's inhabitants beyond our own planet, and the political implications of a planetary worldview. The principal readership is envisaged to comprise scholars working in the fields of astrobiology, big history, and space exploration, interested in forging interdisciplinary links between these diverse topics together with educators and a wider public interested in the societal implications of the cosmic and evolutionary perspectives engendered by research in these fields.

Perspectives on International Relations Henry R. Nau, 2019-12-04

Nau clarifies that which is complicated thereby allowing students to make better sense of their world and to become better global citizens. Stewart Dippel, University of the Ozarks. Henry R. Nau's best-selling book, *Perspectives on International Relations*, is admired for its even-handed presentation of realism, liberalism, constructivism, and critical theory and for integrating these perspectives in every chapter. Students are able to explore the ways these different perspectives shape our understanding of the root causes of historical events and current controversies and then think critically about the world's most urgent issues. The new Seventh Edition includes updates on Brexit, the rise of nationalism, the escalation of terrorism, the use of social media in political protests around the world, and continuing developments in North Korea, Syria, Iran, China, and Russia.
