Hoyt, 2005-03-01 For use in schools and libraries only Looks at whale physiology diet lifespan complex behaviors and habitats The Eye of the Whale: a Rescue Story (Tilbury House Nature Book) Jennifer O'Connell, 2016-03-15 On a cool December morning near San Francisco a distress call was radioed to shore by a local fisherman He had discovered a humpback whale tangled in hundreds of yards of crab trap lines struggling to stay afloat A team of volunteers answered the call and four divers risked their lives to rescue the enormous animal It was the first successful whale disentanglement performed off the West Coast of the United States and prompted a rare and remarkable demonstration of animal behavior This celebrated story beautifully depicted in Jennifer O Connells mesmerizing paintings will make you wonder about animal emotions and the unique connections we can have with other animals seven whales To research The Eye of the Whale Jennifer traveled to San Francisco where she met Captain Mick Menigoz and rode his rescue boat Superfish out into the Pacific Ocean to the area where the events in the book took place This experience fueled her inspiration as she created the images and words of this extraordinary story Big Miracle Tom Rose, 2011-12-20 Now a major motion picture starring Drew Barrymore Ted Danson Kristen Bell Tim Blake Nelson John Krasinski and Vinessa Shaw an account of the dramatic rescue of three gray whales trapped under the ice in Alaska in 1988 Set in Cold War era 1988 Big Miracle tells the real story behind the remarkable bizarre and oftentimes uproarious event that

mesmerized the world for weeks On October 7 an Inuit hunter near Barrow Alaska found three California Gray whales imprisoned in the Arctic ice In the past as was nature s way trapped whales always died Not this time Tom Rose who was covering the event for a Japanese TV station compellingly describes how oil company executives environmental activists Inupiat people small business people and the U S military boldly worked together to rescue the whales He also tells the stories of some of the more than 150 international journalists who brought the story to the world s attention The rescue was followed by millions of people around the world as Ronald Reagan and Mikhail Gorbachev joined the forces of their two nations to help free the whales

*Connection on the Ice* Patti H. Clayton,1998 On Friday October 7 1988 Roy Ahmaogak of Barrow Alaska discovered three young gray whales trapped in ice off the Arctic coast The three week rescue operation that followed cost more than a million dollars and grew to include the White House the Soviet Union the environmental community Eskimo whalers Alaskan oil companies school children and journalists from around the world the Alaska National Guard and a host of other corporate governmental scientific and individual participants Some called it a non event a fiasco an absurd waste of money while others considered it the most extraordinary animal rescue effort ever undertaken In any case it is a story not likely to be forgotten Both complex and moving this story grounds Patti Clayton s overview of environmental ethics theory Using the story as a touchstone for critical comparison Clayton explores three major traditions of environmental philosophy extensionism ecofeminism s care ethic and Heideggerian Phenomenology In doing so she guides readers through the evolution and central concepts of each tradition moving intriguingly between theory and the well known rescue story as an apt illustration of the complexities of ethical deliberation Clayton s critical thinking leads to a deeper appreciation of the ways in which different sets of assumptions yield unique interpretations of such issues Readers have the opportunity to consider the implications of this environmental ethics issue as a microcosm of human nonhuman interaction The unifying narrative of the whale story which is based on the commentary of participants and observers provides both an engaging vehicle for the study of environmental ethics and a real world testament to the multifaceted nature of human nonhuman relationships encouraging readers to reflect on the connection of such incidents in their own lives Author note Patti H Clayton is Visiting Lecturer in the Division of Multidisciplinary Studies at North Carolina State University
