This is a book about teachers' classroom motivating styles. Motivating style is the interpersonal tone and face-to-face behavior the teacher relies on when trying to motivate students to engage in classroom activities and procedures. The overarching goal of the book is to help teachers work through the professional developmental process to learn how to provide instruction in ways that students will find to be motivationally enriching, satisfying, and engagement-generating. To realize this goal, the book features six parts: Part 1 Introduction introduces what teachers are to support, namely student motivation; Part 2 Motivating Style explains what a supportive motivating style is; Part 3 How to overviews the recommended motivationally supportive instructional strategies, one by one and step by step; Part 4 Workshop walks the reader through the skill-building workshop experience; Part 5 Benefits details all the student, teacher, and classroom benefits that come from an improved motivating style; and Part 6 Getting Started discusses ways to begin using these skills in the classroom. Based on a successful workshop program run by the authors, teachers successfully improve their classroom motivating style. In doing so, they experience gains in their teaching skill and efficacy, job satisfaction, a renewed passion for teaching, and a more satisfying relationship with their students. This multi-authored book provides teachers with the practical, concrete, step-by-step skill-based how-to they need to develop a highly supportive motivating style. *Albert Einstein - Chief Engineer of the Universe 2 Volume Set* Jürgen Renn, 2005-12-23.
