The Earth Terry J. Jennings, 1990
EBOOK: Embodying Women's Work Caroline Gatrell, 2008-09-16 What is the relationship between women's reproductive bodies and women's productive work How does women's potential for maternity affect women's workplace opportunity How far can women choose and maintain their own embodied boundaries in relation to work and working practices This fascinating and topical book evaluates the growing debate on gender women's bodies and work Through the lens of the body and from a feminist perspective Gatrell considers women's work from two angles the first conceptualizing the labour of maternity as women's work the second exploring the dynamics between women's bodies and employment The author suggests that maternity constitutes women's work with some women expected to produce children while others are criticised for giving birth She calls for the re conceptualization of pregnancy birth and breastfeeding as forms of labour asserting that mothers are required to perform particular forms of body work in order to comply with ideals

of good mothering and norms of the workplace The book observes that these are conflicting requirements which place irreconcilable demands on women and constrain women's choice At the heart of *Embodying Women's Work* is the idea that women's bodies are central to gendered power relations and remain a negotiated site of power between men and women within late modern society The book considers women's bodies in the context of different forms of paid work discussing how far women remain at an economic disadvantage in comparison with male workers *Embodying Women's Work* is of key interest for students and academics of sociology social welfare and women's studies *American Bookseller*, 1990

A Ladybird Book of Your Body David Scott Daniell, 1967 **A Ladybird Book: The Human Body** Elizabeth Jenner, 2021-08-05 Every human being is different and yet we are made from the same building blocks Beneath the skin's surface are bones tissues muscles and cells that work together to help us live breathe move and feel The Human Body is an accessible introduction to the human body from the tiny cells to the intricate organ systems It looks at how everything works

together to help us live breathe move and feel You can build your own encyclopedia with Ladybird Books Other titles available in the series Animal Habitats Insects and Minibeasts Baby Animals Trees Sea Creatures Electricity Weather Trains The Solar System *The Compu-mark Directory of U.S. Trademarks*, 1991 Webster's Easy Learning English Vocabulary: Your essential guide to accurate English (Collins Webster's Easy Learning) Collins, 2012-03-31 Collins Easy Learning English Vocabulary is designed to help learners of all ages build their vocabulary This easy to use topic based book is an invaluable resource for students and teachers and is ideal for use in the classroom and for home study **The Transvaal Educational News**, 1969 Ladybird First Facts about Your Body Caroline Arnold, 1990 **First Assemblies** Rowland William Crisby Purton, Caroline Storey, 1981 **Subject Guide to Children's Books In Print, 1996** R R Bowker Publishing, 1996 Food Policy and Practice in Early Childhood Education and Care Francesca Vaghi, 2023-11-24 This book is about food and feeding in early childhood education and care offering an exploration of the intersection of children s food education family intervention and public health policies The notion of good food for children is often communicated as a matter of common sense by policymakers and public health authorities yet the social material and practical aspects of feeding children are far from straightforward Drawing on a detailed ethnographic study conducted in a London nursery and children s centre this book provides a close examination of the practices of childcare practitioners children and parents asking how the universalism of policy and bureaucracy fits with the particularism of feeding and eating in the early years Looking at the unintended consequences that emerged in the field such as contradictory public health messaging and arbitrary policy interventions the book reveals the harmful assumptions about disadvantaged groups that are perpetuated in policy discourse and challenges the constructs of individual choice and responsibility as main determinants of health Children s food practices at the nursery are examined to explore the notion that whilst for adults it is what children eat that often matters most to children it is how they eat that is more important This book contributes to a growing body of literature evidencing how children s food is a contested domain in which power relations are continuously negotiated This raises questions not only on how children can be included in policy beyond a tokenistic involvement but also on what children s well being might mean beyond the biomedical sphere The book will particularly appeal to students and scholars in food and health food policy childhood studies and medical anthropology Policymakers and non governmental bodies working in the domains of children s food and early years policies will also find this book of interest
