Organic Farming Framework:

Organic Agriculture Development Strategies, 2018 *Re-Thinking Organic Food and Farming in a Changing World*

Bernhard Freyer, Jim Bingen, 2014-10-17 This book is based on the assumption that organic has lost its way. Paradoxically it comes at a time when we witness the continuing of growth in organic food production and markets around the world. Yet the book claims that organic has lost sight of its first or fundamental philosophical principles and ontological assumptions. The collection offers empirically grounded discussions that address the principles and fundamental assumptions of organic farming and marketing practices. The book draws attention to the core principles of organic and offers different clearly articulated and well defined conceptual frameworks that offer new insights into organic practices. Divided into five parts the book presents new perspectives on enduring issues, examines standards and certification, gives insights into much discussed and additional market and consumer issues, and reviews the interplay of organic and conventional farming. The book concludes with a framework for rethinking ethics in the organic movement and reflections on the positioning of organic ethics. *Development Centre Studies Towards Greener and More Inclusive Societies in Southeast Asia* OECD, 2024-03-11

Nikolaos Pasamitros, Nikolaos Papakostas, 2015-03-01 The Western Balkan countries have been both a popular subject matter for diachronic analysis and a 1990s favorite. The significant changes that followed the most recent times of conflict in the region mostly evolve around the process of Europeanization. Despite the plethora of analyses, most approaches to the Western Balkans suffer from theoretical stagnancy *ex parte* political practice and detachment of politics from societal needs. This volume is the work of a team of theorists and practitioners who attempt a multidisciplinary approach to Western Balkans reality. An Agenda for the Western Balkans offers a critical view on issues that have been over-analyzed in mainstream terms and opens a discussion that will occupy researchers and practitioners for years to come. It addresses novel topics and engages in innovative approaches that cut across disciplines of social sciences, political science, international relations, sociology, historiography, geography, political economy, and levels of analysis: local, national, regional, European, global. This collection is a pioneer theoretical and practical guide towards a sustainable future for the Western Balkans. *Bioactive Compounds in Edible Mushrooms* Sylvester Chibueze Izah, Matthew Chidozie Ogwu, Muhammad Akram, 2025-05-28 This handbook offers a comprehensive perspective of edible mushrooms, phytochemistry, and explores the application of bioactive compounds from fungi in nutrition, medicine, and environmental sustainability.
