Talking Of Wales:

Talking of Wales Trevor Fishlock, 1978-01-01 *Networking Europe* Eberhard Bort, Neil Evans, 2000-01-01 From 1991 an annual symposium at Freudenstadt in Germany has explored issues in the European regions This representative collection of papers presented offers a view of the future of the EU which stresses the need for more democracy and for a conception of Europe that emphasizes its diversity Gestures Alice Butler, Nell Osborne, Hilary White, 2025-01-28 Gestures A body of work is a cross disciplinary collection of feminist approaches to gesture that considers the term s complex registers across embodied aesthetic and political scenes Attending to gestural movements languages feelings and communications the book argues that gestures can unsettle gendered sexed and racialised relations norms and affects Contributors activate the lens of gesture to offer innovative readings of art and literary works from the 1960s onwards and in transnational contexts Experiments in art writing and autotheory reflect on the entanglement of the body gesture and feminist practice The book proposes that gesture be rethought as a mode of feminist practice that includes art writing performance and theory Mixing disciplines forms genres and voices these contributions and the book s gestural structure offer a bold intervention into the conventions of critical writing Political Integration and Disintegration in the British Isles Anthony H. Birch, 2024-06-26 Originally published in 1977 this book provided the first analysis of the processes of political integration and devolution within the British Isles taking account of the social economic and cultural factors involved as well as the unique character of the political system together with the growth of Scottish and Welsh nationalism The book contains both an analysis of the nationalist movements of Ireland Ulster Scotland and Wales and a critical assessment of the way British central Governments have reacted to these movements **White Settlers** Charles Jedrej, Mark Nuttall, 2013-09-13 First Published in 1996 Feelings about the repopulation of remote rural areas are nowadays expressed in rather alarming terms so that in the word of a Skye land owner the filling of empty glens with people regardless of origin is dangerous because it can destroy the ancient culture which is so precious Yet it is remarkable that the depopulation which characterized the previous centuries was greeted with virtually the same reaction The repopulation of rural Scotland which since the beginning of the century has been wished for as the solution to the great problem of rural depopulation has provoked an ambiguous response This book describes the local experience of recent population changes and addresses the problem of repopulation It analyses the paradoxes ironies and ambiguities that form a complex structure of feelings much of which is only partially evident at any one time **Life, Letters, and Literary Remains of J. H. Shorthouse** Joseph Henry Shorthouse, 1905 Official Record of the Debates ... Australia. Constitutional Convention, 1898 Wörterbuch Der Englischen Volkssprache Australiens und Einiger Englischen Mischsprachen Karl Lentzner, 1891 **Language, Interaction and National Identity** Stephen Hester, William Housley, 2017-05-15 Contemporary political and public discourse has come alive with the issues and conflicts surrounding questions of national identity Despite the widespread sociological attention it has drawn as a result most studies

of national identity have been conducted at considerable analytical distance from the lived reality of national identity talk. This collection brings together the work of contemporary researchers situating the talk and interaction in which national identities are actually expressed and used. The book presents detailed investigations of how persons actually use national identity in their talk, the interactional uses to which such expressions are put, and the interactional consequences of such identity talk. The studies are based on transcribed tape recordings of naturally occurring talk across a variety of different countries and settings, illuminating not only situated national identity talk as a phenomenon in its own right but also providing empirically grounded research for traditional sociological theorising about issues of integration, devolution, and exclusion.

Regions J. Nicholas Entrikin, 2017-05-15. This volume gathers a collection of the most seminal essays written by leading experts in the field which identify or signal many of the changing directions of regional research in geography during the past fifty years. Various forms of new regionalism or new regional geography have emerged over the last several decades, especially in political and economic geography, but in general the region has been a concept in declining use. Despite this, the region has gained new currency in sub-areas of political and economic geography, and a so-called new regionalism has emerged in studies of the changing nature of the nation-state in a globalizing economy. Taken together, the essays in this volume provide the reader with a comprehensive overview of academic developments in this area of geographical research.
