Salmi-Adubofour,1999 This study sought answers to the question What instructional activities using computers can best be done in the classroom and or the lab Six teachers from the Seattle area were interviewed to ascertain their ways of incorporating computer assisted instructions into other content areas Well liked educational software SuccessMaker was examined and extensive literature was reviewed The data collected in the study was qualtiatively analyzed and the findings triangulated Factors contributing to integration and implementation were technical support computer training curriculum software Internet use personnel and on line education These results suggest that computer related technologies appear to be valuable catalysts for helping teachers refashion schools at the most systematic level to become what teachers and society have always wanted them to be **Using New Technology in the Classroom** Kristine Brown,1999 This book guides teacher on questions of how when and where to use computers for language education in the classroom It discusses CALL and non CALL programs the effect of computers on the learner and the teacher the pedagogical implications of computer assisted learning and evaluation issues Benefits and limitations of the Internet are discussed as are implications of new technology for future teaching and learning A brief overview of current theory is followed by strategies and practical suggestions from practising teachers Computers and Classroom Culture Janet Ward Schofield,1996-02-01 As important as it is to realize the potential of computer technology to improve education it is just as important to understand how the

social organization of schools and classrooms influences the use of computers and in turn is affected by that technology in unanticipated ways In Computers and Classroom Culture Janet Schofield observes the fascinating dynamics of the computer age classroom Among her many discoveries Schofield describes how the use of an artificially intelligent tutor in a geometry class unexpectedly changes aspects such as the level of peer competition and the teacher s grading practices She also discusses why many teachers fail to make significant instructional use of computers and how gender appears to have a crucial impact on students reactions to computer use All educators sociologists and psychologists concerned with educational computing and the changing shape of the classroom will find themselves compellingly engaged   **Handbook of Classroom Management** Carolyn M. Evertson,Carol S. Weinstein,2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management
