frameworks Here vividly the scope of modern interpretation became too extreme by neglecting the role of multiple factors of a plural society in the welfare determination process Very recently few interesting welfare interpretations are also coming with multidisciplinary approach like Samuelson's social welfare functions Sen's capability approach etc In fact the methodological battle in handling both qualitative and quantitative variables classical economists follows general equilibrium analysis while later developments focus on Paretian Condition analysis So the prediction of social welfare from the Pareto analysis of modern welfare economics has very limited scope than the classical economics
