How Geography and Institutions Shaped the Development of Nations Irina Busygina,2024-11-20 This book provides a concise and informative introduction to how geography and institutions shaped the development of nations showing that while the role of institutions for the development of nations is indisputable the role of geographic factors remains underexplored and underestimated Drawing on rich empirical material from the history and modernity of different continents and nations *How Geography and Institutions Shaped the Development of Nations Across Countries and Continents* seeks to show not only the importance of geographical explanations of development but also their extraordinary diversity This book is divided into two parts The first part examines the main contributions to the understanding of development under the influence of geographic and institutional factors as well as state s geographic attributes and borders as geographic institutions The second part immerses the reader in empirical material presenting various cases on different continents in

An Introduction to Health Planning for Developing Health Systems Andrew Green, 2007-01-11 Health planning is a critical component when responding to the health needs of low and middle income countries characterised by particularly stringent resource constraints The major communicable diseases such as AIDS TB and malaria often appear in parallel with growing non communicable diseases including heart disease and diabetes and yet resources are often less than the levels recommended by the World Health Organisation for basic health care The new edition of this well respected text explains the importance of health planning in both developing regions such as Africa and those in transition such as Central and Eastern Europe It stresses the importance of understanding the national and international context in which planning occurs and provides an up to date analysis of the major current policy issues including health reforms Separate chapters are dedicated to the distinct issues of finance for health care and human resource planning The various techniques used at each stage of the planning process are explained starting with the situational analysis and then looking in turn at priority setting option appraisal programming implementation monitoring and evaluation The book ends by examining the challenges facing planners in the 21st century particularly in the light of growing globalisation A major theme of the book is the need to recognise and reconcile the inevitable tension that lies between value judgements and rational decision making As such in addition to introducing techniques such as costing and economic appraisal it also outlines techniques such as stakeholder analysis for understanding the relative attitudes and power of different groups in planning decisions Each chapter includes a comprehensive bibliography including key websites a summary and exercises to help the reader practise techniques and better understand the content The book argues that all health professionals and community groups should be involved in the planning process for it to be effective and will therefore appeal to anyone involved in planning

Cultural Encounters as Intervention Practices Lene Bull Christiansen, Lise Paulsen Galal, Kirsten Hvenegaard-Lassen, 2020-05-06 Setting up cultural encounters is a widespread intervention strategy employed to diffuse conflicts and manage difficulties related to diversity These organised cultural encounters bring together people of different backgrounds in order to promote peaceful coexistence and inclusion These transformative aims relate to the participants but are often also expected to spill over into the society community or context addressed by the encounter As a category Organised Cultural Encounters draws together a variety of activities and events such as multicultural festivals dialogue initiatives diversity training and inclusion projects activities that are generally not considered to be of the same kind Most of the existing literature on these types of encounters is instrumental and has an overall emphasis on evaluations in terms of outcome or success rate This book goes beyond evaluations and the contributors pose and debate theoretical and methodological questions and analyse the practices and

performativities of particular encounters Taken together it makes an important contribution to the theorisation and analysis of intercultural relations and negotiations This book was originally published as a special issue of the Journal of Intercultural Studies **Intercom** ,1972 The Harvard Classics: The Harvard classics.
