Syntax And Human Experience:

Syntax and Human Experience Nicolas Ruwet, 1991-09-24 Ruwet raises fundamental questions about the place of grammar in the study of language and provides several studies which suggest the possibility that some core data are outside the realm of grammatical explanation A very remarkable book in which the breadth of Ruwet's reflection is both challenging and deeply rewarding Denis Bouchard University of Quebec Montreal

Hermann Broch and Mass Hysteria Brett E. Sterling, 2022 The first English language monograph on Hermann Broch's literary and theoretical work on mass hysteria Winner of the 2023 Radomir Luža Prize for the Best Manuscript in Austrian Czechoslovak Studies in the World War II Era Austrian Jewish author Hermann Broch 1886-1951 a leading figure of European Modernism spent decades attempting to understand the phenomenon of mass hysteria With his work he hoped to help protect society from the allure of mass hysteria embodied in the fanatical appeal of National Socialism He was torn between two approaches to the problem using literature to diagnose and expose the irrational knowledge that underpins mass hysteria and employing theory as a more precise and effective means of doing the same In this first English language monograph on the topic Brett E Sterling traces the development of Broch's understanding of the mass from an initial confrontation in 1918 to a recurring theme in his fiction and ultimately to the monumental but incomplete *Massenwahntheorie* *Theory of Mass Hysteria* 1939-48 In thorough readings of Broch's major fictional and theoretical works the analysis centers on the question of how his literature and theory provide distinct but complementary approaches to conceiving and representing the elusive figure of the mass and the attendant experience of mass hysteria With political extremism and conspiratorial thinking on the rise Sterling makes the case that Broch's insights into mass hysteria literary as well as theoretical are of renewed relevance to a contemporary audience

conspiratorial thinking on the rise Sterling makes the case that Broch's insights into mass hysteria literary as well as theoretical are of renewed relevance to a contemporary audience literary as well as theoretical are of renewed relevance to a contemporary audience *God Is Mathematics* Dr. Thomas Stark, What's the most radical idea possible the one least likely to be understood by humanity the one so far beyond humanity's level of intelligence that whoever champions it is likely to be regarded as insane Go on if you're smart you ought to be conceive of a connection so unobvious so invisible to the masses so improbable in relation to any other idea that it will be almost universally rejected That idea despised mocked and reviled by practically everyone will be the No 1 candidate for being the authentic answer to existence Pythagoras was the genius that delivered this idea 2 500 years ago when he said All things are numbers The last connection that the average person would ever make when they look at the world is that what they are actually seeing beyond the level of superficial appearance is nothing but numbers That is the ultimate unthinkable thought **God is Mathematics** **Listening in** Eric Prieto,2002-01-01 What can music teach a novelist autobiographer or playwright about the art of telling stories The musical play of forms and sounds seems initially to have little to do with the representational function of the traditional narrative genres Yet throughout the modernist era music has been invoked as a model for narrative in its specifically mimetic dimension Although modernist writers may conceive of musical communication in widely divergent ways they have tended to agree on one crucial point that music can help transform narrative into a medium better adapted to the representation of consciousness Eric Prieto studies the twentieth century evolution of this use of music with particular emphasis on the postwar Parisian avant garde For such writers as Samuel Beckett Michel Leiris and Robert Pinget music provides a number of guiding metaphors for the inwardly directed mode of mimesis that Prieto calls listening in where the object of representation is not the outside world but the subtly modulating relations between consciousness and world This kind of semiotic boundary crossing between music and literature is inherently metaphorical but as Prieto's analyses of Beckett Leiris and Pinget show these interart analogies provide valuable clues for bringing to light the unspoken assumptions obscurely understood principles and extra literary aspirations that gave such urgency to the modernist quest to better represent the mind in action **Ethics Lost in Modernity** Matthew Vest,2023-07-21 Ethics Lost in Modernity Reflections on Wittgenstein and Bioethics turns to the philosopher Ludwig Wittgenstein as a guide to understand the immense success yet great danger of bioethics Matthew Vest traces the story of bioethics since its inception in the late 1960s as a way to uncover a number of hidden assumptions within modern ethics that relies upon scientific theorizing as the fundamental way of thinking Autonomy and utilitarianism in particular are two nearly unquestioned goals of scientific theorizing that are easily accessible but at what cost Vest argues that such an ethics enacts a thin moral calculation that runs the risk of enslaving ethics to scientism Far from the depth of religious ethos and practices of virtue modern ethics is lost amidst thin ethical theories enacting a language game that instrumentalizes ethics in service of technological bureaucratic and professional end goals He proposes that true moral living

is far from anti science but rather is envisioned best when ethics and science are balanced with keen insights from ancient sacred cosmology

Meaning in the Arts Louis Arnaud Reid,2014-02-04 This is Volume II of three in a collection on Aesthetics Originally published in 1969 this volume of the Muirhead library of philosophy After distinguishing and relating the functions of Criticism and Aesthetics in Part I Part II develops the basic thesis of the book which is that the central defining characteristic of the aesthetic is embodiment rather than expression Part III tests this out in examples from the different arts representative and abstract with very special attention to music as an abstract art in which the problem of art s apparently contradictory characters of being both autonomous and yet expressive of life outside art is seen in its most acute form Part IV is a philosophical analysis of the main concepts so far involved meaning symbolism knowledge truth standards in art as distinct from other discursive knowledge It concludes with a discussion of the question whether art is in any sense a revelation Part V considers the bearing of the arguments of the book on aesthetic education

We Built Reality Jason Blakely,2020-06-02 This book is about the abuse of scientific authority and the spread of pseudoscience into almost all facets of our everyday lives Readers learn how popular sciences of everything from dating and economics to voting and artificial intelligence have radically changed the world we live in No part of modern society remains untouched by the abuse of popular scientific authority which played a role in the 2008 economic crisis the failure to predict the rise of Trump and various other major tensions in our society But this book also offers readers a way out of the culture of scientism The hermeneutic or interpretive approach promises to free ordinary people from pseudoscience and helps them become better readers of both the many claims to science around us as well as the cultural spaces we inhabit and help to create
