*Dao Companion to Chinese Buddhist Philosophy* Youru Wang, Sandra A. Wawrytko, 2019-01-31 Too often Buddhism has been subjected to the Procrustean box of western thought whereby it is stretched to fit fixed categories or had essential aspects lopped off to accommodate vastly different cultural norms and aims After several generations of scholarly discussion in English speaking communities it is time to move to the next hermeneutical stage Buddhist philosophy must be liberated from the confines of a quasi religious stereotype and judged on its own merits Hence this work will approach Chinese Buddhism as a philosophical tradition in its own right not as an historical after thought nor as an occasion for comparative discussions that assume the west alone sets the standards for or is the origin of philosophy and its methodologies Viewed within their own context Chinese Buddhist philosophers have much to contribute to a wide range of philosophical concerns including metaphysics epistemology ethics philosophy of language philosophy of mind and philosophy of religion even though Western divisions of philosophy may not exhaust the rich contents of Chinese Buddhist philosophy

*Analysis and Interpretation in the Exact Sciences* Melanie Frappier, Derek Brown, Robert DiSalle, 2012-02-26 The essays in this volume concern the points of intersection between analytic philosophy and the philosophy of the exact sciences More precisely it concern connections between knowledge in mathematics and the exact sciences on the one hand and the conceptual foundations of knowledge in general Its guiding idea is that in contemporary philosophy of science there are profound problems of theoretical interpretation problems that transcend both the methodological concerns of general philosophy of science and the technical concerns of philosophers of particular sciences A fruitful approach to these problems combines the study of scientific detail with the kind of conceptual analysis that is characteristic of the modern analytic tradition Such an approach is shared by these contributors some primarily known as analytic philosophers some as philosophers of science but all deeply aware that the problems of analysis and interpretation link these fields together
