Topics In Complex Analysis Contemporary Mathematics Volume 38:

Topics in Complex Analysis Dorothy Brown Shaffer, 1985 Presents mathematical ideas based on papers given at an AMS meeting held at Fairfield University in October 1983 This work deals with the Loewner equation classical results on coefficient bodies and modern optimal control theory It also deals with support points for the class S Loewner chains and the process of truncation Selected Topics in Complex Analysis Vladimir Ya. Eiderman, Mikhail V. Samokhin, 2006-03-30 This volume is dedicated to the memory of the outstanding mathematician S Ya Khavinson It begins with an expository paper by V P Havin presenting a comprehensive survey of Khavinson's works as well as certain biographical material The complete bibliography following this paper has not previously been published anywhere It consists of 163 items a considerable part of these cannot be found in easily accessible sources The book also contains a series of photographs and twelve original peer reviewed research and expository papers by leading mathematicians worldwide including the joint paper by S Ya Khavinson and T S Kuzina the last publication of S Ya Khavinson **Geometric Function Theory in Higher Dimension** Filippo Bracci, 2018-03-24 The book collects the most relevant outcomes from the INdAM Workshop Geometric Function Theory in Higher Dimension held in Cortona on September 5-9 2016 The Workshop was mainly devoted to discussions of basic open problems in the area and this volume follows the same line In particular it offers a selection of original contributions on Loewner theory in one and higher dimensions semigroups theory iteration theory and related topics Written by experts in geometric function theory in one and several complex variables it focuses on new research frontiers in this area and on challenging open problems The book is intended for graduate students and researchers working in complex analysis several complex variables and geometric function theory *Catalogue, Books and Journals in Advanced Mathematics* American Mathematical Society, 1985 **The Mathematical Intelligencer**, 1988 *Notices of the American Mathematical Society* American Mathematical Society, 1994 **Directory of Published Proceedings**, 1987 Books in Series, 1876-1949 R.R. Bowker Company, 1982 *Mathematics of Computation*, 1960* Original articles on all aspects of numerical mathematics book reviews mathematical tables and technical notes Covers advances in numerical analysis application of computer methods high speed calculating and other aids to computation Subject Guide to Books in Print, 1996 **An Introduction to Basic Fourier Series** Sergei Suslov, 2013-03-09 It was with the publication of Norbert Wiener's book *The Fourier Integral and Certain of Its Applications* 165 in 1933 by Cambridge University Press that the mathematical community came to realize that there is an alternative approach to the study of classical Fourier Analysis namely through the theory of classical orthogonal polynomials Little would he know at that time that this little idea of his would help usher in a new and exciting branch of classical analysis called q Fourier Analysis Attempts at finding q analogs of Fourier and other related transforms were made by other authors but it took the mathematical insight and instincts of none other than Richard Askey the grand master of Special Functions and Orthogonal Polynomials to see the natural connection between orthogonal

polynomials and a systematic theory of q Fourier Analysis The paper that he wrote in 1993 with N M Atakishiyev and S K Suslov entitled An Analog of the Fourier Transform for a q Harmonic Oscillator 13 was probably the first significant publication in this area The Poisson kernel for the continuous q Hermite polynomials plays a role of the q exponential function for the analog of the Fourier integral under consideration see also 14 for an extension of the q Fourier transform to the general case of Askey Wilson polynomials Another important ingredient of the q Fourier Analysis that deserves thorough investigation is the theory of q Fourier series
