Seven Radical Ideas for the Future of Higher Education

Claire Macken, Julie Hare, Kay Souter, 2021-08-07 This book focuses on the disruption of the tertiary higher education system as a result of societal changes occasioned by the Fourth Industrial Revolution and hastened by COVID 19 It takes the view

that higher education is on an inevitable trajectory of disruption as a result of globalisation technological disruption and disaggregation of the formal education sector but that it must not lose sight of its central role in equipping current and future students for the new economy The book takes a student centric and big picture approach examining some of the biggest challenges facing massified higher education systems The authors consider ways to achieve modern responsive and efficient higher education systems globally that are economically sound for governments and affordable for individuals

researchers and students Sociology and the Future of Work Paul Ransome, 2019-01-04 First published in 1999 this book adopts an explicitly forward looking and dynamic approach in trying to understand not only where the sociology of work has come from but of where it is likely to go next For the first time in a single volume it reviews the continuing usefulness of the classical accounts of Karl Marx Max Webster and Emile Durkheim the post industrial accounts of the 1960s and 1970s and the post Fordist accounts of the 1980s and 1990s It provides specific treatment of key topics such as technological change and flexibility the impact of gender on work the changing nature of the relationship between work and personal identity and the possible emergence of economic globalization all of which are currently receiving much academic and popular attention The treatments of gender identity and globalization are challenging and innovative in that they go beyond simply describing current debates and question the validity of some of the premises on which they are based For example that it is not possible to provide a unifying explanation of gender inequality at work because its causes are multiple rather than singular that it is wrong to imply that work will cease to be an important basis of personal identity and that evidence of economic globalization is far too patchy to justify the claim that we are living in a global economy The text combines theoretical analysis with clear descriptions of the key arguments and tests these against current empirical data The Future of Work Charles B.

Simulations and the Future of Learning Clark Aldrich, 2003-10-27
Simulations and the Future of Learning offers trainers and educators the information and perspective they need to understand, design, build and deploy computer simulations for this generation. Looking back on his recent first-hand experience as lead designer for an advanced leadership development simulation, author Clark Aldrich has created a detailed case study of the creation and deployment of an e-learning simulation that had the development cycle of a modern computer game. With this book, Aldrich, a leader in the e-learning field, has created an intriguing roadmap for the future of learning while taking us along on an entertaining rollercoaster ride of trial and error, success and failure. Simulations and the Future of Learning outlines the design principles and critical decisions around any simulation's components: the interface, the physics and animation systems, the artificial intelligence and sets and figures. Using this accessible resource, readers will learn how to create and evaluate successful simulations that have the following characteristics: authentic and relevant scenarios, applied pressure situations that tap user's emotion and force them to act, a sense of unrestricted options and replayability.

The Future of the Leader-Member Exchange Theory Aharon Tziner, Erich Christian Fein, 2021-10-04

The Future of Work, Employment and Social Protection Peter Auer, Bernard Gazier, 2002
This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment and social protection. Reflecting the aim of the Symposium itself, the book provides in-depth reflections on work, employment and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family-friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market change are also debated, and the book explores the positive and negative sides of globalization and its links with technological change.
