America by Julie Young Julie Petersen and Kay Johnson traces the evolution of online learning over the past three decades from early distance learning courses to today's wide range of dynamic online and hybrid school models. Drawing on case studies and personal experiences, the authors emphasize how successful online learning depends not just on technology but on thoughtful design, pedagogy, and attention to each student's unique needs. The book examines both the achievements and challenges of virtual learning, including early research limitations, uneven adoption, and the constraints of traditional metrics. Aimed at practitioners and policymakers, it seeks to inform and influence the policies and perspectives that affect access to virtual learning. In this pragmatic and optimistic book, the authors hope to empower students by inspiring educators and leaders to make teaching and learning more accessible and more personalized.

The Transformation of Social Work Education through Virtual Learning R. Paul Maiden, 2019-09-12

Over the past few years, numerous highly ranked Tier 1 universities across the United States have embraced the development of advanced online degrees, a niche of secondary education long held by a small group of private for-profit universities. Rapid advances in online learning technology, increasingly sophisticated and easy to use learning management systems, and anytime anywhere access has dramatically increased the demand of individuals, mostly full-time employed working professionals. This volume addresses the dramatic changes that are occurring in social work pedagogy as more schools develop online programs. The University of Southern California Suzanne Dworak Peck School of Social Work launched their Virtual Academic Center with a cohort of 80 online students. The program has now reached a steady state of 2,200 virtual students, now representing two-thirds of their MSW student population. Additionally, the school launched a doctorate of social work degree with a focus on leading and managing innovation, leading public discourse, and management of large complex systems. This book essentially tells the USC story with the challenges faced in embracing this new technology, teaching social work courses in an online environment, as well as pedagogical enhancements made by faculty in converting traditional campus-based courses to the virtual environment.

Going Online Robert Ubell, 2016-12-08

In *Going Online*, one of our most respected online learning leaders offers insights into virtual education: what it is, how it works, where it came from, and where it may be headed. Robert Ubell reaches back to the days when distance learning was practiced by mail in correspondence schools and then leads us on a tour behind the screen, touching on a wide array of topics along the way, including what it takes to teach online and the virtual student experience. You'll learn about how to build a sustainable online program, how to create an active learning online course, why so many faculty resist teaching online, how virtual teamwork enhances digital instruction, how to manage online course ownership, how learning analytics improves online instruction. Ubell says that it is not technology alone but rather unconventional pedagogies supported by technological innovations that truly activate today's classrooms. He argues that innovations introduced online, principally peer-to-peer and collaborative learning, offer significantly increased creative learning options across all age groups and educational sectors. This impressive collection, drawn from Ubell's decades of

experience as a digital education pioneer presents a powerful case for embracing online learning for its transformational potential

Using the Internet for Virtual School Dagmar Geisler, 2024-07-02

From award-winning author Dagmar Geisler in collaboration with illustrator Nikolai Renger, a new series for elementary school students about social, emotional, learning, and physical and mental health. In recent years, children of all ages, just like many adults from all over the world, have had to shift the way they learn and work. They've adapted to sitting in front of their computers or tablets instead of in a physical class with their peers. Some have thrived in this environment, while others struggle to prepare themselves for the virtual learning experience. In *Using the Internet for Virtual School*, best friends Madison and Luke quickly learn all about what can go wrong if they're not prepared for their virtual lessons when Luke's older brother Tim experiences a stressful online presentation. The laptop dies, his video files won't load, and possibly worst of all, he didn't realize an embarrassing babyish poster was hanging on the wall behind him the whole time. This sours Tim's mood for the foreseeable future, and Madison and Luke decide to make a list of the Do's and Don'ts of virtual school and presentations so they don't replicate Tim's disaster of a day when it comes time for them to join their class online. In this timely book, award-winning author Dagmar Geisler presents tips and

tricks as well as some golden rules to help primary school students prepare for their digital lessons and presentations This is a strong conversation starter for adults and children and is also a practical guide
