The ^AMolecular Vision of Life Lily E. Kay, 1992-12-03 This fascinating study examines the rise of American molecular biology to disciplinary dominance focusing on the period between 1930 and the elucidation of DNA structure in the mid 1950s Research undertaken during this period with its focus on genetic structure and function endowed scientists with then unprecedented power over life By viewing the new biology as both a scientific and cultural enterprise Lily E Kay shows that the growth of molecular biology was a result of systematic efforts by key scientists and their sponsors to direct the development of biological research toward a shared vision of science and society She analyzes the motivations and mechanisms empowering this vision by focusing on two key institutions Caltech and its sponsor the Rockefeller Foundation Her study explores a number of vital sometimes controversial topics among them the role of private power centers in shaping scientific agenda and the political dimensions of pure research It also advances a sobering argument the cognitive and social groundwork for genetic engineering and human genome projects was laid by the American architects of molecular biology during these early decades of the project This book will be of interest to molecular biologists historians sociologists and the general reader alike

Visions of the Real Alexandru Calcatinge, 2011 The cultural landscape is what lies around us and has to be understood and learned to deal with The best way to do this is to start from the beginning in order to understand the contemporary iterations of the concept We will not reinvent the concept but we will try to create a new way to see it The operative concept of cultural landscape is part of a reality that is seen and visioned differently by each individual This means that the concept has an almost infinite number of meanings Thus this book presents some of the visions of the surrounding reality through the eyes of an architect
