Handbook of Virtual Humans Nadia Magnenat-Thalmann, Daniel Thalmann, 2005-10-31 Virtual Humans are becoming more and more popular and used in many applications such as the entertainment industry in both film and games and medical applications This comprehensive book covers all areas of this growing industry including face and body motion body modelling hair simulation expressive speech simulation and facial communication interaction with 3D objects rendering skin and clothes and the standards for Virtual Humans Written by a team of current and former researchers at MIRALab University of Geneva or VRlab EPFL this book is the definitive guide to the area Explains the concept of avatars and autonomous virtual actors and the main techniques to create and animate them body and face Presents the concepts of behavioural animation crowd simulation intercommunication between virtual humans and interaction between real humans and autonomous virtual humans Addresses the advanced topics of hair representation and cloth animation with applications in fashion design Discusses the standards for Virtual Humans such as MPEG 4 Face Animation and MPEG 4 Body Animation

New Advances in Virtual Humans Nadia Magnenat-Thalmann, N. Ichalkaranje, 2008-07-23 In this book various aspects of cognitive and emotional behaviour is described In chapter one a state of the art introduction to VH is presented and the associated research is given In Chapter 2 cognitive and emotions processes are described A Comprehensive context model for multi party interactions with the VH is given in the next chapter Finally it is very important to model the socializing of groups of virtual humans This is discussed in Chapter 4 The automatic modelling of expressions for VH is described in Chapter 5 The last chapter gives a case study of an intelligent kios avatar and its

usability This book gives examples of some advances that enable VH to behave intelligently It provides an overview of these research problems and some unsolved problems *Virtual Humans* Peter M. Plantec,2004 Foreword by Ray Kurzweil author

The Age of Spiritual Machines Virtual humans may seem like something out of science fiction but they are already here Companies use them as website hosts individuals use them as personal assistants and people interact with them in computer games educational applications and many other arenas The possibilities are limitless but the most amazing thing is that anyone can create a V human from scratch Virtual Humans gives not just start to finish instructions for designing a charming synthetic person but also a CD ROM containing the tools and techniques to make it real Readers will learn how to create their own authentic and engaging personalities apply VH technology to business and individual projects add synthetic voices and realistic faces to virtual humans use personality psychology and humor in character design design advanced emotion expression engines This book and CD package is the first of its kind and a landmark on a par with the first build your own Web site products Readers will be among the first to create ultra realistic versatile V human personalities and will start well ahead of what is soon to be a tidal wave of worldwide interest *Handbook of Virtual Humans* Nadia Magnenat-Thalmann, Daniel Thalmann,2004-10-29 Virtual Humans are becoming more and more popular and used in many applications such as the entertainment industry in both film and games and medical applications This comprehensive book covers all areas of this growing industry including face and body motion body modelling hair simulation expressive speech simulation and facial communication interaction with 3D objects rendering skin and clothes and the standards for Virtual Humans Written by a team of current and former researchers at MIRALab University of Geneva or VRlab EPFL this book is the definitive guide to the area Explains the concept of avatars and autonomous virtual actors and the main techniques to create and animate them body and face Presents the concepts of behavioural animation crowd simulation intercommunication between virtual humans and interaction between real humans and autonomous virtual humans Addresses the advanced topics of hair representation and cloth animation with applications in fashion design Discusses the standards for Virtual Humans such as MPEG 4 Face Animation and MPEG 4 Body Animation *Virtual Worlds*,2000

outstanding questions that had been raised in the research community Moon Nass 2000 1 If a virtual human has more human like characteristics will it elicit stronger social responses from people 2 How do the human like characteristics interact in terms of the strength of social responses Two social psychological social facilitation and politeness norm experiments were conducted to answer these questions The first experiment investigated whether virtual humans can evoke a social facilitation response and how strong that response is when participants are given different cognitive tasks e g anagrams mazes modular arithmetic that vary in difficulty They did the tasks alone in the company of another person or in the company of a virtual human that varied in terms of features The second experiment investigated whether people apply politeness norms to virtual humans Participants were tutored and quizzed either by a virtual human tutor that varied in terms of features or a human tutor Participants then evaluated the tutor s performance either directly by the tutor or indirectly via a paper and pencil questionnaire Results indicate that virtual humans can produce social facilitation not only with facial appearance but also with voice recordings In addition performance in the presence of voice synced facial appearance seems to elicit stronger social facilitation i e no statistical difference compared to performance in the human presence condition than in the presence of voice only or face only Similar findings were observed with the politeness norm experiment Participants who evaluated their tutor directly reported the tutor s performance more favorably than participants who evaluated their tutor indirectly In addition this valence toward the voice synced facial appearance had no statistical difference compared to the valence toward the human tutor condition The results suggest that designers of virtual humans should be mindful about the social nature of virtual humans
