Sustainable Marketing and the Circular Economy in Poland Anita Proszowska, Ewa Prymon-Ryś, Anna Dubel, Anna Kondak, Aleksandra Wilk, 2024-03-22

Sustainable Marketing and the Circular Economy in Poland outlines the specific challenges around formulating an organisation's marketing strategy in line with the circular economy (CE) framework. This book helps to solve the problem of ineffective pro-environmental programmes and marketing tools which are currently used by enterprises to make their activities more sustainable. The authors identify key concepts and strategies of sustainable marketing to highlight the trends and development directions of marketing activities of modern enterprises. Focussing on Poland as a central case study, the book is illustrated with examples of organisations that are implementing sustainable marketing activities that are compatible with the CE model. It also presents the results of studies which examined the pro-environmental marketing efforts of small and medium-sized enterprises, non-governmental organisations, and other actors in Poland. To conclude, the authors put forward recommendations for CE network stakeholders regarding sustainable marketing management, focussing specifically on how to avoid accusations of greenwashing and other unethical organisational behaviour. This book will be of great interest to students and scholars of green marketing, sustainable business, and the CE, as well as entrepreneurs and business professionals looking to formulate sustainable marketing strategies.

Handbook of Materials Circular Economy Seeram Ramakrishna, Brindha Ramasubramanian, 2024-03-14

This book provides comprehensive and practical information on the design and implementation of circular systems for various industries, with a focus on Environmental, Social, and Governance (ESG) factors. The scope of the handbook is to cover the materials circularity in a deeper analysis in accordance to ESG used in various industries such as oil and gas, IT, electronics, medicine, textile, and more. The handbook also covers the key principles of the circular economy, including material efficiency, resource conservation, and waste reduction, and how they impact different industries. It further critically analyses the challenges and opportunities associated with implementing circular systems in these industries, including the framework for new business models and technical innovations, and the potential benefits in terms of environmental protection, social responsibility, and economic competitiveness. In addition to providing practical information, the handbook also addresses the ESG factors associated with the circular economy exclusively for each industry. This would include the impact of circular systems on the environment, including the reduction of greenhouse gas emissions and the protection of biodiversity, as well as the social benefits such as job creation and the economic benefits such as cost savings and increased competitiveness. The ultimate goal of the handbook should be to provide guidance and support in a niche evaluation for the development of a more sustainable and equitable future, where the circular economy is a key enabler.
