Handbook of Nutrition and Ophthalmology Richard David Semba,2007-12-06 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient health professionals questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to
