Vlsi And Parallel Computing For Pattern Recognition And Artificial Intelligence N Ranganathan,1995-06-30 This book covers parallel algorithms and architectures and VLSI chips for a range of problems in image processing computer vision pattern recognition and artificial intelligence The specific problems addressed include vision and image processing tasks Fast Fourier Transforms Hough Transforms Discrete Cosine Transforms image compression polygon matching template matching pattern matching fuzzy expert systems and image rotation The collection of papers gives the reader a good introduction to the state of the art while for an expert this serves as a good reference and a source of some new contributions in this field

VLSI & Parallel Computing for Pattern Recognition & Artificial Intelligence N. Ranganathan,1995 **Parallel Computation and Computers for Artificial Intelligence** J.S. Kowalik,2012-12-06 It has been widely recognized that artificial intelligence computations offer large potential for distributed and parallel processing Unfortunately not much is known about designing parallel AI algorithms and efficient easy to use parallel computer architectures for AI applications The field of parallel computation and computers for AI is in its infancy but some significant ideas have appeared and initial practical experience has become available The purpose of this book has been to collect in one volume contributions from several leading researchers and pioneers of AI that represent a sample of these ideas and experiences This sample does not include all schools of thought nor contributions from all leading researchers but it covers a relatively wide variety of views and topics and in this sense can be helpful in assessing the state of the art We hope that the book will serve at least as a pointer to more specialized literature and that it will stimulate interest in the area of parallel AI processing It has been a great pleasure and a privilege to cooperate with all contributors to this volume They have my warmest thanks and gratitude Mrs Birgitta Knapp has assisted me in the editorial task and demonstrated a great deal of skill and patience Janusz S Kowalik vii INTRODUCTION Artificial intelligence AI computer programs can be very time consuming **Automated breast cancer detection and classification using ultrasound images: A survey** H.D.Cheng,Juan Shan,Wen Ju,Yanhui Guo,Ling Zhang, Breast cancer is the second leading cause of death for women all over the world Since the cause of the disease remains unknown early detection and diagnosis is the key for breast cancer control and it can increase the success of treatment save lives and reduce cost Ultrasound imaging is one of the most frequently used diagnosis tools to detect and classify abnormalities of the breast New Systems and Architectures for Automatic Speech Recognition and Synthesis Renato DeMori,Ching Y.
