Zero-Dimensional Commutative Rings David F. Anderson, David Dobbs, 1995-04-10 This work presents advances in zero dimensional commutative rings and commutative algebra It illustrates the research frontier with 52 open problems together with comments on the relevant literature and offers a comprehensive index for easy access to information Wide ranging developments in commutative ring theory are examined

Abelian Groups, Module Theory, and Topology Dikran Dikranjan, 2019-05-16 Features a stimulating selection of papers on abelian groups commutative and noncommutative rings and their modules and topological groups Investigates currently popular topics such as Butler groups and almost completely decomposable groups

Abelian Groups and Modules Alberto Facchini, Claudia Menini, 2012-12-06 On the 26th of November 1992 the organizing committee gathered together at Luigi Salce s invitation for the first time The tradition of abelian groups and modules Italian conferences Rome 77 Udine 85 Bressanone 90 needed to be kept up by one more meeting Since that first time it was clear to us that our goal was not so easy In fact the main intended topics of abelian groups modules over commutative rings and non commutative rings have become so specialized in the last years that it looked really ambitious to fit them into only one meeting Anyway since everyone of us shared the same mathematical roots we did want to emphasize a common link So we elaborated the long symposium schedule three days of abelian groups and three days of modules over non commutative rings with a two days bridge of commutative algebra in between Many of the most famous names in these fields took part to the meeting Over 140 participants both attending and contributing the 18 Main Lectures and 64 Communications see list on page xv provided a really wide audience for an Algebra meeting Now that the meeting is over we can say that our initial feeling was right

Homological and Combinatorial Methods in Algebra Ayman Badawi, Mohammad Reza Vedadi, Siamak Yassemi, Ahmad Yousefian Darani, 2018-03-01 Based on the 4th Seminar on Algebra and its Applications organized by the University of Mohaghegh Ardabili this volume highlights recent developments and trends in algebra and its applications Selected and peer reviewed the contributions in this volume cover areas that have flourished in the last few decades including homological algebra combinatorial algebra module theory and linear algebra over rings multiplicative ideal theory and integer valued polynomials Held biennially since 2010 SAA introduces Iranian faculty and graduate students to important ideas in the mainstream of algebra and opens channels of communication between Iranian mathematicians and algebraists from around the globe to facilitate collaborative research Ideal for graduate students and researchers in the field these proceedings present the best of the seminar s research achievements and new contributions to the field

Chapman, Sarah Glaz, 2013-03-09 Commutative Ring Theory emerged as a distinct field of research in mathematics only at the beginning of the twentieth century It is rooted in nineteenth century major works in

Number Theory and Algebraic Geometry for which it provided a useful tool for proving results From this humble origin it flourished into a field of study in its own right of an astonishing richness and interest Nowadays one has to specialize in an area of this vast field in order to be able to master its wealth of results and come up with worthwhile contributions One of the major areas of the field of Commutative Ring Theory is the study of non Noetherian rings The last ten years have seen a lively flurry of activity in this area including a large number of conferences and special sections at national and international meetings dedicated to presenting its results an abundance of articles in scientific journals and a substantial number of books capturing some of its topics This rapid growth and the occasion of the new Millennium prompted us to embark on a project aimed at presenting an overview of the recent research in the area With this in mind we invited many of the most prominent researchers in Non Noetherian Commutative Ring Theory to write expository articles representing the most recent topics of research in this area

Zero-dimensional Schemes Ferruccio Orecchia, Luca Chiantini, 1994 The series is aimed specifically at publishing peer reviewed reviews and contributions presented at workshops and conferences Each volume is associated with a particular conference symposium or workshop These events cover various topics within pure and applied mathematics and provide up to date coverage of new developments methods and applications
