

The Hybrid Office is how leaders need to make the transition away from everyone

The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed for the people.

Before making any significant decisions or investments, it is important to understand the pain points of everyone involved in the decision-making process. Employees, all leaders, IT staff, and all employees who would work both in and out.

You want to build a model that is based on what all these things are for everyone, and address the most common challenges raised by your team.

How do you think about how you could deliver a personalized employee experience? How will that new workplace, functionalities and services support the experience of how people do you want the experience to be?

As decisions can be made by a few teams, the more planning is there that there is.
