Sturm Der Ruhe What Is Architecture:

Sturm der Ruhe Johannes Porsch,2001-01 **Sturm Der Ruhe** Dietmar Steiner,Jonannes Porsch,Architektur Zentrum Wien,2001 **Dwell** ,2002-02 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines **The Aesthetics of Atmospheres** Gernot Böhme,2016-09-13 Interest in sensory atmospheres and architectural and urban ambiances has been growing for over 30 years A key figure in this field is acclaimed German philosopher Gernot B hme whose influential conception of what atmospheres are and how they function has been only partially available to the English speaking public This translation of key essays along with an original introduction charts the development of Gernot B hme s philosophy of atmospheres and how it can be applied in various contexts such as scenography commodity aesthetics advertising architecture design and art The phenomenological analysis of atmospheres has proved very fruitful and its most important and successful application has been within aesthetics The material background of this success may be seen in the ubiquitous aestheticization of our lifeworld or from another perspective of the staging of everything every event and performance The theory of atmospheres becoming an aesthetic theory thus reveals the theatrical not to say manipulative character of politics commerce of the event society But taken as a positive theory of certain phenomena it offers new perspectives on architecture design and art It made the spatial and the experience of space and places a central subject and hence rehabilitated the ephemeral in the arts Taking its numerous impacts in many fields together it initiated a new humanism the individual as a living person and his or her perspective are taken seriously and this fosters the ongoing democratization of culture in particular the possibility for everybody to participate in art and its works **Simulation** Andrea Gleiniger,Georg Vrachliotis,2012-11-05 Digitalization has transformed the discourse of architecture that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning or had different meanings in the context of architectural theory and design Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology The new series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion In the context of discussions of the medial the notion of simulation plays a central role in architecture as illusion and imitation In dialogue with information technology and computer science however that notion has now taken on a new quality in architectural discourse Today when we speak of simulation we primarily think of computer simulation the technical ability to simulate processes Whereas simulation used to refer to a mode of presentation it now connects architecture with the sciences and represents a strategic and methodological instrument a tool of discovery With the scientific principle of simulation the focus shifts to the idea of modeling a dynamic

Department of Architecture, Tampere University of Technology, Occasional Papers ,2004 **Urban Planning and Cultural Identity** William Neill,2003-10-23 Urban Planning and Cultural Identity reviews the intense spatiality of conflict over identity construction in three cities where culture and place identity are not just post modernist playthings but touch on the raw sensibilities of who people define themselves to be Berlin as the reborn German capital has put coming to terms with the Holocaust and the memory of the GDR full square at the centre of urban planning Detroit raises questions about the impotence and complicity of planners in the face of the most extreme metropolitan spatial apartheid in the United States and where African American identity now seems set on a separatist course In Belfast in the clash of Irish nationalist and Ulster unionist traditions place can take on intense emotional meanings in relation to which planners as mediators of
