Science, Strategy and War Frans P.B. Osinga,2007-01-24 John Boyd is often known exclusively for the so called OODA loop model he developed This model refers to a decision making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest This book aims to redress this state of affairs and re examines John Boyd's original contribution to strategic theory By highlighting diverse sources that shaped Boyd's thinking and by offering a comprehensive overview of Boyd's work this volume demonstrates that the common interpretation of the meaning of Boyd's OODA loop concept is incomplete It also shows that Boyd's work is much more comprehensive richer and deeper than is generally thought With his ideas featuring in the literature on Network Centric Warfare a key element of the US and NATO's so called military transformation programmes as well as in the debate on Fourth Generation Warfare Boyd continues to exert a strong influence on Western military thinking Dr Osinga demonstrates how Boyd's work can help us to understand the new strategic threats in the post 9 11 world and establishes why John Boyd should be regarded as one of the most important post modern strategic theorists
