Sudden Changes:

Tarot for the Green Witch Ann Moura, Aoumiel, 2003 From the author of the Green Witchcraft series comes a unique approach to using the Tarot as a spiritual tool for channeling energy and communicating with the Divine Utilizing themes and images from Natural Witchcraft this book takes readers step by step through the Major and Minor arcana Illustrations

Earthquake Displacement Fields and the Rotation of the Earth L. Mansinha, D.E. Smylie, A.E. Beck, 2012-12-06 The seeds of this conference were sown with the publication by Press in 1965 of a paper in which he suggested that the displacement field due to a major earthquake may extend over much greater distances than had been thought possible before Later on Mansinha and Smylie pointed out that if Press was correct then since the redistribution of significant quantities of mass was involved the inertia tensor of the earth would be altered and thus cause the earth to wobble this revived the idea that earthquakes might be the long sought source for maintaining the Chandler Wobble They argued that since earthquakes are sudden events it should be worthwhile trying to determine if there was any correlation between sudden changes in the Chandler term of the pole path and major earthquakes Furthermore since displacements occur both before and after an earthquake it might be possible to obtain a few days warning of a major earthquake by making instantaneous observations of the pole path Analysis of the data indicated some correlation but as often happens in science in general and in geophysics in particular the results were not conclusive because of imperfect theory and the need for more accurate determinations of the pole position It soon became clear that a meeting between geophysicists and astronomers involved in this type of work would be of mutual benefit

Catastrophism Richard J. Huggett, 1997 One of the most dramatic intellectual events of the last decade has been the stunning re emergence of the catastrophist paradigm in the biological and earth sciences From killer asteroids to emergent viruses it has become evident that the history of life on earth has been shaped far more than previous orthodoxies would allow by extreme events and non linear processes The old uniformitarian dogma of steady rate evolution has been decisively challenged by the research of contemporary neo catastrophists like Stephen Jay Gould David Raup Stuart Ross Taylor Ursula Marvin and Kenneth Hsu Whether debating the origin of the moon or the current human impact on the biosphere they urge us to recognize the radically event or chance driven structure of natural history Surveying these various theories of uniformitarian and neo catastrophist thought in a clear and accessible fashion and seeking a path towards a new and workable synthesis Richard Huggett provides a superb introduction to the ideas which have defined the way we look at the world
