Theories Of Development

Michael Seilmaier

Theories Of Development:

Theories of Development William C. Crain, 2005 For undergraduate graduate courses in Child Development Lifespan Development and Theories of Development The result of extensive scholarship and consultation with leading scholars this text introduces students to twenty four theorists and compares and contrasts their theories on how we develop as individuals Emphasizing the theories that build upon the developmental tradition established by Rousseau this text also covers theories in the environmental learning tradition

Theories of Developmental Psychology Patricia H. Miller, 2002 This book places the major theories of development in historical and contemporary context and provides frameworks for understanding and perceiving the significance of the research findings in developmental psychology

Concepts and Theories of Human Development Richard M. Lerner, 2013-05-13 A classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives Since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis As a consequence a developmental systems orientation frames the presentation in this edition This new edition has been expanded substantially in comparison to the second edition Special features include A separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism Two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented A new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives A more differentiated treatment of nature oriented theories of development is provided There are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of Konrad Lorenz and a new chapter on sociobiology A new chapter concentrates on applied developmental science

An Introduction to Theories of Human Development Neil J Salkind, 2004-01-22 The book is well written and the theorists and their respective work are well presented and clearly explained As a text dealing with the historical overview of major theorists and their work in human development over the last century or so it is extremely strong and could be widely used in a variety of both undergraduate and graduate courses Ann C Diver Stamnes Humboldt State University In general I found the websites and references listed at the end of each chapter to be very interesting and useful for taking students beyond what is in the text Jane Ledingham University of Ottawa A fine choice for a classic theories course and I believe that the level of presentation would be appropriate for advanced

undergraduate or graduate students The up to date web sites at the end of each section are a definite plus The choice of sites is excellent Cosby Steele Rogers Virginia Tech An Introduction to Theories of Human Development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors Why might our behavior as an adult be so different from when we were infants Why and how does one stage of development follow the next Are the changes that we experience abrupt in nature or smooth and predictable Author Neil J Salkind reflects on such critical questions to help readers understand what happens along the way as one develops from infancy through later life This book provides a comprehensive view of the primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives Along with a brief discussion of a historical background for each of these approaches An Introduction to Theories of Human Development examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology Features of this text A final integrative chapter compares the various theories presented in the book using Murry Sidman s model of six criteria for judging a theory to help develop students skills for critically assessing theory Classic approaches to understanding human behavior across the lifespan are also examined Pedagogical features such as chapter opening quotes boxed highlights key terms a glossary and websites for further reading enhance student understanding of everyday human behavior An Introduction to Theories of Human Development is an accessible text for advanced undergraduate students in the social and behavioral sciences including such fields as psychology education human services nursing sociology social welfare and human development and family studies

Theories of Human Development Barbara M. Newman, Philip R. Newman, 2010-10-18 Intended for courses on theories of human development this new text presents nine theories grouped into three major families those that emphasize biological systems those that emphasize environmental factors and those that emphasize a dynamic interaction between biological and environmental forces The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights The inclusion of social role theory and life course theory expand the book s relevance to the study of adulthood and aging Grouping the theories by families enhances students ability to think critically about theoretical ideas assess the strengths and weaknesses of each theory and gain a deeper understanding of how each theory guides research and application The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these theories together Discussion of each theory includes the historical and cultural context in which the theory was developed an overview of key concepts and important ideas new directions in contemporary scientific work a research example illustrating how the theory has been tested and modified an application showing how the theory has guided the design of an intervention or program an analysis of how the theory answers basic questions about human development and a critique highlighting the theories strengths and weaknesses

Theories of Human Development serves as a text in advanced undergraduate and or beginning graduate courses in theories of human development Its clear organization and engaging writing style make it accessible to students with a minimal background in human development

Theories of Development William Crain,2015-10-02 The result of extensive scholarship and consultation with leading scholars this text introduces students to twenty four theorists and compares and contrasts their theories on how we develop as individuals Emphasizing the theories that build upon the developmental tradition established by Rousseau this text also covers theories in the environmental learning tradition

Theories of Development Jonas Langer,1969 *Exploring Developmental Theories* Frances Degen Horowitz,2014-02-25 Through the evaluation and integration of developmental theories this volume proposes a new structural behavioral model of development Dr Horowitz s model helps account for both the behavioral development of children with extensions across the life span and for the universal and non universal characteristics in human behavioral development Exploring Developmental Theories also sheds a new and different light on the nature nurture or heredity environment controversy and on the topic of continuity and discontinuity in development Exploring Developmental Theories examines the concepts of stage structure and systems organismic theory and general system theory analyzes open and closed systems as well as organismic and mechanistic world views integrates the concepts associated with organismic and mechanist world views examines learning mechanisms and processes that foster the acquisition of behavior and discusses the strengths and weaknesses of Gessel Piaget and behaviorism in accounting for behavioral development

Child Development Rosalyn H. Shute,Phillip T. Slee,2015-05-15 *Child Development Theories and Critical Perspectives* provides an engaging and perceptive overview of both well established and recent theories in child and adolescent psychology This unique summary of traditional scientific perspectives alongside critical post modern thinking will provide readers with a sense of the historical development of different schools of thought The authors also place theories of child development in philosophical and cultural contexts explore links between them and consider the implications of theory for practice in the light of the latest thinking and developments in implementation and translational science Early chapters cover mainstream theories such as those of Piaget Skinner Freud Maccoby and Vygotsky whilst later chapters present interesting lesser known theorists such as Sergei Rubinstein and more recent influential theorists such as Esther Thelen The book also addresses lifespan perspectives and systems theory and describes the latest thinking in areas ranging from evolutionary theory and epigenetics to feminism the voice of the child and Indigenous theories The new edition of *Child Development* has been extensively revised to include considerable recent advances in the field As with the previous edition the book has been written with the student in mind and includes a number of useful pedagogical features including further reading discussion questions activities and websites of interest *Child Development Theories and Critical Perspectives* will be essential reading for students on advanced courses in developmental psychology education social work and social policy and the lucid style will also make it accessible to readers with little or no background in

psychology *Recent Theories of Human Development* R. Murray Thomas, 2000-10-17 Intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the course of the past 20 years This period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past In addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions Theories of Human Development Neil J.

Salkind, 1985-01-18 Provides a clearly written basic introduction to the different theoretical approaches to understanding human development designed for the first year student of human development Features an overview and discussion of the maturational biological psychoanalytic behavioral and cognitive developmental theories of human development and includes applied examples of every theory and a set of seven questions used to compare and contrast theories presented throughout the book **Growth and Development Across the Lifespan** Gloria Leifer, Eve Fleck, 2012-10-19 This book provides introductory coverage of growth and development throughout the lifespan The content emphasizes normal aspects as well as the unique problems and health promotion needs of each age and stage of development It features a strong health promotion theme structured around Healthy People 2020 objectives Lifespan coverage from prenatal development to death helps students integrate concepts related to normal changes in each stage of the life cycle Coverage of current research and trends in health care provide readers with the most up to date accurate information Health promotion and disease prevention including Healthy People 2020 objectives are highlighted throughout the book Cultural content is highlighted throughout the book and in new Chapter 3 Cultural Considerations in Health Care to encourage students to consider cultural implications at every stage of development Separate chapter on advanced old age and geriatrics Chapter 14 discuss the theories physiological changes and psychological aspects of aging health promotion and maintenance and the role of health care providers in caring for the geriatric patient All of this helps students understand how to maintain quality of life and promote health in advanced old age Teaching techniques for every developmental stage are part of a consistent chapter format and provide age appropriate patient education tips Consistent chapter organization for each stage of growth and development makes information easy to access Critical Thinking scenarios and questions appear at the end of each chapter to help students consider all variables when planning care across the lifespan Student learning features include Objectives Key Terms Key Points and Review Questions Appendix A includes the FDA s Recommended Child and Adult Immunization Schedules providing essential health promotion information NEW Appendix B provides a Multilingual Glossary of Symptoms to enhance students awareness of culturally sensitive care Glossary includes definitions of Key Terms and additional terms help students review concepts and terminology at a glance Bibliography is organized by chapter at the end of the book to

facilitate additional research and study Developmental Psychopathology, Theory and Method Dante Cicchetti,2015-12-22
The seminal reference for the latest research in developmental psychopathology Developmental Psychopathology is a four volume compendium of the most complete and current research on every aspect of the field Volume One Theory and Method focuses on the theoretical and empirical work that has contributed to dramatic advancements in understanding of child and adult development including findings in the areas of genetics and neurobiology as well as social and contextual factors Now in its third edition this comprehensive reference has been fully updated to reflect the current state of the field and its increasingly multilevel and interdisciplinary nature and the increasing importance of translational research Contributions from expert researchers and clinicians provide insight into how multiple levels of analysis may influence individual differences the continuity or discontinuity of patterns and the pathways by which the same developmental outcomes may be achieved Advances in developmental psychopathology have burgeoned since the 2006 publication of the second edition ten years ago and keeping up on the latest findings in multiple avenues of investigation can be burdensome to the busy professional and researcher from psychology and related fields This reference solves the problem by collecting the best of the best as edited by Dante Cicchetti a recognized leader in the field into one place with a logical organization designed for easy reference Get up to date on the latest research from the field Explore new models emerging theory and innovative approaches Learn new technical analysis and research design methods Understand the impact of life stage on mental health The complexity of a field as diverse as developmental psychopathology deepens with each emerging theory and new area of study as made obvious by the exciting findings coming out of institutions and clinics around the world Developmental Psychopathology Volume One Theory and Method brings these findings together into a cohesive broad reaching reference

Economic Theories of Development Diana Hunt,1989 Theories of Human Development Michael G. Green,John A. Piel,2015-07-14 The authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature They show how theories are specific examples of more general points of view called paradigms The theories chosen to represent the three paradigms the Endogenous Paradigm Exogenous Paradigm and the Constructivist Paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm Developmental Theories Through the Life Cycle Sonia G. Austrian,2008-02-18 In this bestselling textbook contributors describe theories of normal human development advanced by such pioneers as Sigmund Freud Anna Freud Jean Piaget Nancy Chodorow Daniel Levinson Erik Erikson and Margaret Mahler Beginning with infancy toddlerhood

and preschool each chapter examines corresponding ideologies concerning maturation and development in middle childhood adolescence adulthood and old age while acknowledging that no one theory can encompass all aspects of human development In depth analyses of the psychology and sociology of development provide educators and practitioners with insights into the specific social contexts of human behavior and help identify variables and deviations This second edition features up to date empirical information including additional studies on diverse populations and a new chapter on attachment theory a growing area of interest for today s clinicians

Theories of Child Development Alfred L. Baldwin, 1966 *Theories of Development ...*, 1997 *Three Theories of Child Development* Henry William Maier, 1978 This study builds upon the belief that a human being is a manifold between being who acts feels and thinks No one account about human development whether behavioral psychodynamic or cognitive can fully explain human development This book is written with the conviction that study research and actual work with children or youth should build upon that which is already known

Child Development Jean A. Mercer, 2018-06-06 Understanding child development is essential to ensuring a full and rounded psychological grounding but given the complex nature of the topic it can be a real challenge *Child Development Concepts and Theories* takes a step back to focus just on the key concepts of child development that all students must learn With this book their first encounters with theories and their applications will mean that they can move on with a firm foundation in child development Central to this is understanding how these theories or concepts are applied in the real world and how psychologists engage with them in research This book gives clear and detailed examples to bring the subject to life Each chapter features case studies that run throughout the chapter and develop as the students own understanding does Written for undergraduates the book will become essential to any student wanting a key to unlock the world of child development Jean Mercer is Professor Emerita of Psychology at Stockton University New Jersey and writes a blog Childmyths at <http://childmyths.blogspot.com>
