

Lesson 9: Thermal Physics

Thermal concepts

Conduction, convection and thermal radiation

- When two solids of different temperatures touch, thermal energy is transferred from the hotter object to the cooler object through a process called **conduction**.
- When atoms of one portion of a material are in contact with vibrating atoms of another portion, the vibration is transferred from atom to atom.

Direction of heat flow

- High T portions vibrate more than low T portions, so we can imagine the vibration “impulse” to travel through the material, from high T to low T .

Thermal Physics

Padhraic Smyth

Thermal Physics:

Decoding **Thermal Physics**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring.
