Toward An End To Hunger In America:

Toward an End to Hunger in America Peter K. Eisinger, 1998 Cheap plentiful food is an American tradition We spend a smaller percentage of our income on food than any other nation We feed much of the world with our surpluses Consumers retailers and restaurants throw away one quarter of our food stock every year And yet data collected by the federal government show that almost 12 percent of American households either suffer from hunger or worry about going hungry Why are so many Americans afflicted with food insecurity during such prosperous times According to this book it s not simply an artifact of poverty even most of the poorest homes have access to adequate food Nor is it indifference to their plight or a lack of ways to help Americans strongly support government food assistance and there are a host of public and private programs devoted to feeding the hungry Peter Eisinger seeks to unravel the puzzle of America s hunger and asserts that it is a problem that can be solved He believes that the perception of hunger and responses to it emerge from a complex intellectual political and social context He begins by looking for a meaningful definition of hunger then examines the structure and funding of government food assistance programs the roles of Congress and community interest groups and the contributions of volunteer organizations He concludes by offering ideas to reduce the nation s perplexing hunger problem based on creating stronger partnerships between public and private food programs

Starving in the Shadow of Plenty Ellen Levine, Loretta Schwartz-Nobel, 2001-05-31 President Ronald Reagans chief advisor on domestic affairs announced in December 1980 that poverty has been virtually wiped out in the United States and the systems of government aid have been a brilliant success Now *Starving in the Shadow of Plenty* lays bare the horrifying truth For the first time since Robert Kennedy traveled the muddy back roads of Mississippi and the war on poverty rose and fell starvation in America is documented Loretta Schwartz Nobel twice winner of the Robert Kennedy Memorial Award for articles on hunger has retraced Kennedys steps and found that Marasmus and Kwashiorkor the most extreme diseases of protein and calorie deficiency still exist in the United States today The author spent seven years traveling across the country and speaking to the hungry in rural shacks urban ghettos on Indian reservations and in previously middle class homes Her book is their story told in their own words But it is also the story of federal corruption and abuse The government of the United States turns countless numbers of eligible people away from existing food programs it allows millions of infants to be malnourished and it seems to be oblivious to citizens who are starving and dying *Starving in the Shadow of Plenty* is the first in a series on hunger in America The authors newest book *Growing Up Empty* the voices and politics of starving children in America a 25 year retrospective will be published by Harper Collins Cliff Street Books in 2002

Regional Overview of Food Security and Nutrition in Latin America and the Caribbean 2020 Food and Agriculture Organization of the United Nations ,World Food Programme ,United Nations International Children's Fund ,International Fund for Agricultural Development ,Pan American Health Organization ,2021-05-19 The goals of the 2030 Agenda for Sustainable Development that are related to food security and nutrition will not be achieved as long as in some territories in Latin America and the Caribbean populations continue to live with malnutrition rates Economic opportunities in these areas are often limited public services are scant and exposure to severe climate events is high The public policies promoted in the region have had less impact in these historically lagging territories and there is a pressing need to produce a new agenda of public instruments that address the characteristics of the communities that inhabit them The full and sustainable development of the territories that are falling behind is not only an obligation in terms of the realization of the rights of their inhabitants it would also allow these territories to activate their social economic environmental and cultural potential to the benefit of all societies It is hoped that the 2020 Regional Overview will help to highlight the challenges experienced by the territories with the worst indicators in terms of food and nutrition and that it will serve to mobilize political commitment and public attention towards those areas that are most highly lagging The year 2020 will be remembered for many decades as the year of the COVID 19 pandemic The indicators of the 2030 Agenda that are used in this publication do not yet show the different impacts of COVID 19 However there are references to the possible implications of the pandemic for the future
