Social and Technical Issues in Testing Barbara S. Plake,1984 Improving the Software Testing Skills of Novices During Onboarding Through Social Transparency Raphael Pham,2016-12-15 Inexperienced software developers such as fresh graduates shape the future of software engineering as a practice Supporting these novice developers in becoming high quality engineers is a key objective of our engineering community Yet inexperienced developers have considerable trouble in applying the fundamentals of systematic software testing in industrial settings Gaps in testing skills arise from inherent attributes of systematic testing itself and environmental attributes such as the educational setting in universities Frustrated practitioners have long since devised cost intensive workarounds In this thesis this problem situation is qualitatively analyzed in great detail leveraging insights from three Grounded Theory studies Employing Everett M Rogers Theory of the Diffusion of Innovation strategic improvements to the onboarding situation are presented Lastly tool support for the strategies developed in this thesis is presented and evaluated

American Society for Testing Materials American Society for Testing Materials,1906 *Designing Ubiquitous Information Environments: Socio-Technical Issues and Challenges* Carsten Sørensen,Youngjin Yoo,Kalle Lyytinen,Janice I. DeGross,2006-01-17 This book records one of the continuous attempts of the IFIP Working Group 8.2 studying the interaction of information systems and the organization to explore and understand the shifting boundaries and dependencies between organizational activities and their computer support The book marks the result of the IFIP WG 8.2 conference on Designing Ubiquitous Information Environments Socio Technical Issues and Challenges Since its inception in the late 1970s IFIP WG 8.2 has sought to understand how computer based information systems interact and must be designed as an integrated part of the organizational design At that time information systems handled repetitive and remote back office functions and the main concern was work task design for repetitive input tasks and the potential impact of improved information support on organizational decision making and structure The focus of the information system design shifted in the 1980s when computers became part of the furniture and moved into the office Reflecting this significant change IFIP WG 8.2 in 1989 organized a conference dedicated to the design and impact of desktop

technology in order to examine how organizational processes and the locus of action changed when the computer was moved into the office Sixteen years later we are experiencing another significant change Computers are now becoming part of our body and sensory system and will move out of the traditional office locations and into the wilderness Again IFIP WG 8
