**Social Capitalism in Theory and Practice: The people's capitalism** Robert Corfe,2008 In the second volume of Corfe's work on Social Capitalism he examines the financial industrial system and identifies issues which are untouched by contemporary politicians across the political spectrum

**Social Capitalism in Theory and Practice: Prosperity in a stable world** Robert Corfe,2008 The reform of the financial industrial infrastructure cannot be undertaken without considering fully the political culture in which it exists But such reforms can only best be initiated from within the capitalist system itself by those most technically competent to effect necessary change and hence this book calls upon the business community to take such an initiative Whilst the first volume of this work traced the development of the new majority and its potential readiness to promote desired change and whilst the second volume laid out the theoretical basis for Social Capitalism and a new political consciousness the third and final volume is concerned with the policies and practicalities of a Social Capitalist world Part I of the present volume is concerned with the international dimension and especially the Third world and the need for its internal capitalisation and redefining the benefits of free trade and the priority of environmental questions Parts II and III are concerned with strategies for national prosperity on the macro economic level in advanced industrial economies and Part IV considers the reforms of the business enterprise in successfully integrating the common aims of employers and employed Part V is an exercise in the critique of Rentier capitalism comprising an expos of 43 leaders of major corporations and Part VI concludes the work with a summary and analytical declaration of Social Capitalist values and aims As this book clearly demonstrates a free and democratic world cannot be achieved or maintained without the successful establishment of a Social Capitalist society which seeks to maximise the individual ownership and control of the means of production distribution and exchange Under different pseudonyms Robert Corfe is also the author of 3 autobiographical works *Death In Riyadh* Geoff Carter describing his life as a businessman in the Middle East in the 80s *My Conflict With A Soviet Spy* Eddie Miller relating his adventures in Finland in the mid 60s and *The Girl From East Berlin* James Furner an epic novel relating his love affair in the old German capital at the end of the 50s

**Roads to Social Capitalism** Peter Flaschel,2012-01-01 The current crises in the financialization of capitalism and their repercussions on the financial viability of entire countries severely question the achievements of mainstream economics and its disregard of Keynes's theory of effective demand and finance In view of this Peter Flaschel and Sigrid Luchtenberg consider roads to a type of capitalism that could eventually be considered as social in nature The authors underpin their study with theory empirical evidence and policy from a positive as well as a normative perspective As points of departure for their concept of social capitalism the theoretical framework provides a synthesis of the work of Marx Keynes and Schumpeter on ruthless capitalism regulated capitalism and competitive socialism

**Religion as Social Capital** Corwin E. Smidt, 2003 While Robert Putnam's *Bowling Alone* 2000 highlighted the notion of volunteerism little attention has been paid to religion's role in generating social capital an ironic omission since religion constitutes the most common form of voluntary association in America today Featuring essays by prominent social scientists this is the first book length systematic examination of the relationship between religion and social capital and what effects religious social capital has on democratic life in the United States

*A New Education for a New Economy: From Human Capital to Human Flourishing* Tal Gilead, 2024-06-03 Providing an in depth novel analysis of education's role in today's economy by scrutinizing its theoretical underpinnings this volume critiques the suitability of the current dominant economic framework for education and for shaping educational policymaking worldwide Critically examining the history and philosophy that underpin our present societal understanding of the link between economics and education the book argues for an urgent redefining of education's role in the economy based on intellectual foundations that significantly differ from our current dominant conceptions Across seven chapters the book posits that the adoption of a new philosophical framework the reshaping of economic and educational aims and the adjustment of our

educational system are each necessary to better promote human flourishing. Ultimately providing a platform to entirely reconsider the idea that the primary aim of education is to serve the economic system in particular economic growth, this book will appeal to scholars, researchers, and postgraduate students studying educational policy, the philosophy of education, and the history of education. More broadly, education policymakers and academics studying education and the economy may also find this book of interest.

Social Capital in the Asia Pacific Yuliani Suseno, Chris Rowley, 2020-05-06. Social capital is broadly conceptualised as consisting of resources and network ties embedded in the social structures and relationships that facilitate beneficial outcomes for the actors within those structures. Despite the number of research studies on social capital, there have been fewer attempts to examine social capital in the context of service-oriented firms, particularly in the Asia Pacific. This is surprising as the service industry plays an important role in the global services trade transactions and business activities. Social capital enables and maintains social relations for business transformation for service-oriented firms. Indeed, it would be unimaginable for any economic activity, particularly in service-oriented firms, to occur without social capital. This examination of social capital in the Asia Pacific region provides the context for recognising the cultural, social, and economic opportunities and challenges of several Asia Pacific countries that can potentially enrich our knowledge and understanding of the region. Contributions are drawn from cases based in Thailand, Indonesia, South Korea, China, and Australia for relevant application in the areas of social capital and service-oriented firms in the Asia Pacific. This book was originally published as a special issue of the *Asia Pacific Business Review*.

Social Capital in the Knowledge Economy Hans Westlund, 2006-09-24. It is possible that there once was a time when scholars used to sit isolated with their cogitations in their attics, emerging now and then to publish their latest edited offerings which no one had ever thought of before. If such a time did once exist, it certainly does so no longer. Writing a scientific or scholarly book in our era is to a large extent a team effort in which your team members are continually changing and you are unceasingly grateful for the privilege of enjoying and benefiting from the exertions, ideas, comments, and support of a large number of very able people. Scientific and scholarly work nowadays is a process impossible without the existence and use of social capital. This book is no exception to the above stated. There are very many colleagues, some of them referees and thus anonymous, and friends who have made the book possible. The foremost of these is Roger Bolton, with whom I wrote my first paper on social capital. Most of that paper has found its way into various passages of this book, while Chapter 6, *Social Capital and Entrepreneurship*, comes almost completely from Roger's pen. Thank you, Roger, for letting me use your text. The empirical studies of the biotech industries of Japan, California, and Sweden would have been impossible without a great deal of help.

Urban Social Capital Gregory W. Streich, 2016-02-11. This volume presents a kaleidoscopic view of the norms and forms of contemporary city life, focusing especially on the processes of social capital formation in the urban milieu. It brings together studies from highly diverse urban settings such as squatter resettlement projects in Kathmandu, urban funeral societies in Africa, an HIV/AIDS community in Los Angeles, the poor of

Harare pensioners in Shanghai Maori gangs in Auckland and a Roma boxing club in Prague among others Contributors draw on contemporary theory and research in social capital political economy urban planning and policy social movements civil society and democracy to explore how social norms networks connections and ties are created deployed and often frayed under conditions of social complexity inequality cultural pluralism and the ethno racial diversity and division characteristic of urban contexts throughout the world In this way the volume engages in a genuinely globalized and globalizing discussion of contemporary urban social life and stands as a unique and timely interdisciplinary contribution to the ever expanding literature devoted to social capital

*Social Capital Theory* Julia Häuberer, 2010-10-27 The field of social capital still lacks a recognized general theory Accordingly various and sometimes inappropriate measurements are used for it Julia Häuberer contributes to filling in this gap and provides progress towards the creation of a formalized social capital theory based on the founding concepts of social capital of Bourdieu 1983 and Coleman 1988 and current concepts of Putnam 2000 Burt 1992 and Lin 2001 The second part of the monograph focuses on the quality of measurements of the more general concept of social capital derived in the first part Therefore the telephone survey Social Relationships among Czech Citizens conducted as a test retest experiment is analyzed This book is valuable reading for academics in Sociology and Political Science
