The Evolutionary Argument against Naturalism Jim Slagle, 2021-06-17 Contemporary discussions in metaphysics epistemology and philosophy of mind are dominated by the presupposition of naturalism Arguing against this established convention Jim Slagle offers a thorough defence of Alvin Plantinga s Evolutionary Argument against Naturalism EAAN and in doing so reveals how it shows that evolution and naturalism are incompatible Charting the development of Plantinga s argument Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties including naturalism itself are self defeating He critiques other well known epistemological approaches including those of Descartes and Quine and deftly counters the many objections against the EAAN to conclude

that metaphysical naturalism should be rejected on the grounds of self defeat By situating Plantinga s argument within a wider context and showing that science and evolution cannot entail naturalism Slagle renders this most common metaphysical view irrational As such the book advocates an important reconsideration of contemporary thought at the intersection of philosophy science and religion **The prologue to the Canterbury tales, with notes by E.F.**
