

THEORETICAL FRAMEWORK APPROACH

TFA

QUALITATIVE DATA ANALYSIS: TFA

Qualitative data analysis (QDA) is performed differently from the quantitative (numerical) facts and figures. Quantitative processing is statistical where specific tools are used to answer each research question included in the research model. However, in qualitative processing, language is not numbers rather text, pictures, audio, video and even quantitative tables and charts. Thus, there is nothing confusing rather just dealing things as per their nature.

Several concepts/models for QDA are available in the market like grounded theory (Glaser & Strauss, 1967), framework-analysis (Richie & Spencer, 1994), thematic network analysis (Stirling, 2001), and augmentation theory (Toulmin, 1858) as an organizing tool. It is interesting that almost all of these methods seek the same and that is reconstruction of major, medium and minor themes (ideas/ factors and their mutual relations, arguments or their parts) according to the requirements of current issue. *This handbook introduces Theoretical Framework Approach –TFA, as the simplest but theoretically well-grounded*
