Transforming Themes Paul J Leslie,2021-07-08

Transforming Themes challenges the dominant view of psychotherapy as a structured reductionist process Instead it views psychotherapy as an alive unrehearsed interaction that embraces healing when it is focused on the role of therapeutic themes These themes are the entrenched frames of references or contexts from which clients perceive their lives In any interaction each participant has a unique worldview When clients come to therapy they bring their problems in the form of a theme the woman who can't forgive or the child who is a terror Any potential statement or action performed within this theme merely strengthens the problem Only when the theme of the therapy session has shifted can clients gain access to inner resources to shift perspectives and begin inner transformation Effective therapy results from moving clients into more flexible empowering themes These changes occur as a result of the dynamic interaction between therapist and client which embraces improvisation creativity and novelty rather than adherence to specific theories or techniques Using historical and modern research and colourful case studies this work will help professionals understand how to easily adapt and apply creative and resourceful therapy interventions no matter what therapeutic orientation they endorse This book will enable therapists counsellors psychologists and social workers to gain access to creative effective methods which help their clients
