Thermal Desorption:

Thermal Desorption William C. Anderson, 2013-11-21 This book is part of a series of eight providing profession wide consensus based assessment of innovative site remediation and hazardous waste treatment technologies *Recycling and Reuse of Material Found on Superfund Sites* Lawrence Smith, Jeffrey L. Means, 1995-02 Provides assistance in identifying recycling technologies for a wide variety of contaminants and matrices including energy recovery decanting thermal desorption solvent extraction pumping and recovery freeze crystallization thermolysis ion exchange reverse osmosis diffusion dialysis evaporation amalgamation cementation electrowinning vitrification physical separation mercury distillation etc Contents description of recycling technologies product quality specifications 8 case studies Extensive references 50 charts and tables Petroleum Biodegradation and Oil Spill Bioremediation Karuna K. Arjoon, James G. Speight, 2022-12-22 The prime focus of the book is to determine the mechanism extent and efficiency of biodegradation processes as it is necessary to know the composition of the original crude oil or crude oil product The technology of bioremediation and the concerns of whether or not bioremediation technologies can accelerate this natural process enough to be considered practical and if so whether they might find a niche as replacements for or adjuncts to other crude oil spill response technologies This book also introduces the reader to the science of the composition of crude oil and crude oil products is at the core of understanding the chemistry of biodegradation and bioremediation processes Gas Chromatography in Air Pollution Analysis V.G. Berezkin, Yu.S. Drugov, 1991-04-25 Air pollution determination is one of the most important fields of gas chromatography application in practice This book provides a systematic description of the main stages of air pollution determination ranging from sampling problems to the quantitative estimation of the acquired data Special attention is paid to the problem of gas vapor spray and solid particles extraction from air The main methods of sampling procedure namely container utilization cryogenic concentration absorption adsorption chemisorption and filter usage and successive impurities extraction are also handled Sorption theory and the problems of sorption and desorption efficiency for hazardous impurities being extracted from traps with sorbents are discussed in detail The practical utilization of different sorbents silica activated carbon polymers etc to carry out sampling procedures for 200 main pollutants with known TLV USSR and USA is also considered This highly informative book reflecting several insufficiently known techniques as well as the experience of both western and Soviet researchers should be of interest to both beginners and skilled researchers Handbook of Environmental Remediation Chaudhery Mustansar Hussain, 2020-03-19 Environmental remediation technologies to control or prevent pollution from hazardous waste material is a growing research area in academia and industry and is a matter of utmost concern to public health to improve ecology and to facilitate the redevelopment of a contaminated site Recently in situ and ex situ remediation technologies have been developed to rectify the contaminated sites utilizing various tools and devices through physical chemical biological electrical and thermal processes to restrain remove extract and immobilize mechanisms

to minimize the contamination effects This handbook brings altogether classical and emerging techniques for hazardous wastes municipal solid wastes and contaminated water sites combining chemical biological and engineering control methods to provide a one stop reference This handbook presents a comprehensive and thorough description of several remediation techniques for contaminated sites resulting from both natural processes and anthropogenic activities Providing critical insights into a range of treatments from chemical oxidation thermal treatment air sparging electrokinetic remediation stabilization solidification permeable reactive barriers thermal desorption and incineration phytoremediation biostimulation and bioaugmentation bioventing and biosparging through ultrasound assisted remediation methods electrochemical remediation methods and nanoremediation this handbook provides the reader an inclusive and detailed overview and then discusses future research directions Closing chapters on green sustainable remediation economics health and safety issues and environmental regulations around site remediation will make this a must have handbook for those working in the field

Cleaning Up Contaminated Wood-Treating Sites DIANE Publishing Company,1996-09 Identifies technologies available for organic hazardous waste cleanup at wood treating sites throughout the country Focuses on the Texarkana Wood Preserving Co Superfund Site in Texas Tables show which kinds of remedy selections have been used at other Superfund wood treating sites around the country destruction technologies separation and concentration technologies and immobilization technologies and institutional controls Information is given about the sites along with the reasoning for why a certain remedy was chosen Bibliography Charts and tables

Encyclopedia of Chemical Processing (Online) Sunggyu Lee,2005-11-01 This second edition Encyclopedia supplies nearly 350 gold standard articles on the methods practices products and standards influencing the chemical industries It offers expertly written articles on technologies at the forefront of the field to maximize and enhance the research and production phases of current and emerging chemical manufacturing practices and techniques This collecting of information is of vital interest to chemical polymer electrical mechanical and civil engineers as well as chemists and chemical researchers A complete reconceptualization of the classic reference series the Encyclopedia of Chemical Processing and Design whose first volume published in 1976 this resource offers extensive A Z treatment of the subject in five simultaneously published volumes with comprehensive indexing of all five volumes in the back matter of each tome It includes material on the design of key unit operations involved with chemical processes the design unit operation and integration of reactors and separation systems process system peripherals such as pumps valves and controllers analytical techniques and equipment and pilot plant design and scale up criteria This reference contains well researched sections on automation equipment design and simulation reliability and maintenance separations technologies and energy and environmental issues Authoritative contributions cover chemical processing equipment engineered systems and laboratory apparatus currently utilized in the field It also presents expert overviews on key engineering science topics in property predictions measurements and analysis novel materials and devices and emerging chemical fields ALSO AVAILABLE ONLINE

been developed to treat hazardous wastes because of the high costs of remediation One such technology is thermal desorption which heats soils sediments and sludges to volatilize any contaminants present Thermal desorption systems consist of units to heat the feedstock and secondary treatment systems to handle the off gases generated during the heating process This method of remediation has been demonstrated under the EPA s Superfund Innovative Technology Evaluation SITE program thereby giving a means of evaluating the performance of the technology The different aspects of desorption processes are discussed along with an in depth review of thermal desorption system components This is followed by an evaluation of thermal desorption as a treatment method by reviewing how well it meets cleanup goals and how safe it is for on site workers Through this evaluation it was determined that thermal desorption is able to achieve cleanup goals but the stack exhaust may contain contaminant levels that exceed recommended exposure values Therefore monitoring of airborne on site contaminant concentrations is required to ensure the safety of personnel With proper monitoring in place thermal desorption can be used safely and effectively at contaminated sites [Toxicological Profile for 1,1,1-trichloroethane](#) ,1995
