## **The Sentence Processing Resource:**

*The Sentence Processing Resource Pack* Jane Marshall, 1999

**Bilingual Sentence Processing** Roberto Heredia, J. Altarriba, 2002-07-25 Bilingual Sentence Processing Interaction Between Attention and Language Systems in Humans Ramesh Kumar Mishra, 2015-10-09 This original volume examines the interface between attentional and linguistic processes in humans from the perspectives of psycholinguistics and cognitive science It systematically explores how autonomy and automaticity are reflected during language processing in a variety of situations A true mechanistic explanation of how humans process language would require a complete understanding of the interface language has with important cognitive systems like attention memory as well as with vision Interdisciplinary work in this area has so far not been able to generate a substantial theoretical position on this issue This volume therefore looks at different language processing domains such as speaking listening reading as well as discourse and text processing to evaluate the role attention plays in such performances and also at how often linguistic inputs affect attentional processing In this sense it proposes that the attention language interface is bidirectional It also considers applied issues like language disorders bilingualism and illiteracy where the attention language interface seems especially relevant as a theoretical apparatus for research investigations Therefore this volume brings closer theoretical explanations from the language sciences and cognitive sciences It argues that language processing is multi modal in its very essence and many conceptual structures in language evolve out of a complex interplay among participating cognitive systems such as attention and memory supported by vision and audition

**Handbook of Child Language Disorders** Richard G. Schwartz, 2010-10-18 The Handbook of Child Language Disorders provides an in depth comprehensive and state of the art review of current research concerning the nature assessment and remediation of language disorders in children The book includes chapters focusing on specific groups of childhood disorders SLI autism genetic syndromes dyslexia hearing impairment the linguistic perceptual genetic neurobiological and cognitive bases of these disorders and the context of language disorders bilingual across dialects and across languages To examine the nature of deficits their assessment and remediation across populations chapters address the main components of language morphology syntax semantics and pragmatics and related areas processing memory attention executive function such as reading and writing Finally even though there is extensive information regarding research and clinical methods in each chapter there are individual chapters that focus directly on research methods This Handbook is a comprehensive reference source for clinicians and researchers and can be used as a textbook for undergraduate masters and doctoral students in speech language pathology developmental psychology special education disabilities studies neuropsychology and in other fields interested in children s language disorders

**Attention and Performance XII** Max Coltheart, 2016-09-19 Originally published in 1987 this volume presented a comprehensive state of the art account of what was known about the psychology of reading at the time All the fundamental aspects of reading are considered visual attention visual feature analysis visual

masking letter and word recognition priming effects eye movements in reading phonological processing working memory and reading parsing sentence comprehension and text integration The subject of reading is approached from a variety of different theoretical perspectives including cognitive psychology connectionism neuropsychology and linguistics This broad and comprehensive review will still be of value for undergraduate and graduate teaching as well as research workers engaged in experimental or theoretical investigations of any aspect of the psychology of reading Cognition, Language and Aging Heather Harris Wright,2016-03-16 Age related changes in cognitive and language functions have been extensively researched over the past half century The older adult represents a unique population for studying cognition and language because of the many challenges that are presented with investigating this population including individual differences in education life experiences health issues social identity as well as gender The purpose of this book is to provide an advanced text that considers these unique challenges and assembles in one source current information regarding a language in the aging population and b current theories accounting for age related changes in language function A thoughtful and comprehensive review of current research spanning different disciplines that study aging will achieve this purpose Such disciplines include linguistics psychology sociolinguistics neurosciences cognitive sciences and communication sciences As of January 2019 this e book is freely available thanks to the support of libraries working with Knowledge Unlatched
