**The Skeleton Inside You** Philip Balestrino,1989-03-14 Your skeleton helps you leap somersault and touch your toes without it you would be as floppy as a beanbag There are over 200 bones living and growing inside you that make up your skeleton There are also ligaments and joints that hold your bones together and cartilage in your bendable parts like your ears and your nose Learn all about what a skeleton can do because this isn't some make believe Halloween skeleton this is the real skeleton inside you

**The Skeleton Revealed** Steve Huskey,2017-02-15 Gorgeous high contrast photographs reveal the eerie beauty of the vertebrate skeleton The vertebrate skeleton is one of nature's most amazing feats Composed of cartilage and bone it forms the supportive structure for all the remaining aspects of our anatomy Stripped of skin we can see the body's fascinating underlying architecture In this one of a kind book biologist and skeletal reconstructionist Steve Huskey lays bare the vertebrate skeleton providing a guided tour of the nuanced differences among the many featured vertebrate species Using skeletal preparations he has spent decades assembling Huskey helps us understand why animals live the way they do He shows us the jaw and fang structures that allow venomous snakes to both kill and consume their prey whole We see that the eastern mole is built like a weightlifter allowing it to swim through soil Startling images demonstrate that the odd looking trumpetfish is built not for music but for suction with a skull that expands to vacuum in its prey The pages of *The Skeleton Revealed* illuminate not only the elegance of each skeleton but also the natural history story each skeleton tells Come along let's take a voyage through the boneyard
